

There will be a Science Test at the end of every Unit. We have been working on the unit: Changes in Heat since the beginning of November. We will review in class, but here is a study guide to help you study. The test will be on Friday, December 9, 2016.

The test will have 13 questions

Matching (4 questions)

Multiple Choice (9 questions)

- 1) How does heat change things?
- 2) Which changes are permanent? (They can't go back to the way they were before heat was added) – give some examples
- 3) Which changes are not permanent? (They can go back to the way they were before heat was added) – give some examples
- 4) What is a substance?
- 5) What happens when temperature rises?
- 6) What happens when temperature lowers?
- 7) Adding heat energy causes temperatures to raise or lower?
- 8) Taking away heat energy causes temperatures to raise or lower?
