

*Four survivors find themselves stranded on a strange new island, with no way to call for help or easily escape. The survivors must find a way to cooperate and survive until they find a way out, all while trying to avoid the dangerous wildlife that threaten their very survival. Can they work as a team to make it out alive, and will they discover the supernatural ruins found deep within the heart of the island?*

\*\*\*

### **Character Creation:**

How this works: Before creating your character, you give me confirmation you wish to join, and I'll pick out a random power from here:

<https://powerlisting.wikia.com/wiki/Special:Random>

You can try creating weapons from the materials provided by the island, and potentially acquire new powers from possible supernatural ruins.

Regardless of the powers chosen for the players, all characters are roughly the same tier based on their feats, with maximum speed being peak human. But beware, for the vast majority of wildlife on the island are strong enough to pose a real threat to even the whole group. Don't fool around, lest you wanna become the next meal for one of the resident predators.

4 players only.
