ADDITIONAL INFORMATION FOR THE TRIPLE CROWN OPEN CHAMPIONSHIPS:

COMPETITION JUDGING SYSTEM

An overall impression scoring system is used whereby the judging panel will score the competitor out of 100 points by looking at the overall routine, how the run progresses and flows and the amplitude, difficulty, variety and execution of all tricks.

- Amplitude means the height of the tricks performed.
- Difficulty refers to not only the tricks performed but also the placement of the tricks and the combinations used.
- Variety refers to a good mix of Standard Airs and Rotations, performed on each feature.
- Execution refers to the stability, fluidity and control of manoeuvres performed.

Judges are looking at how the competitor puts together the run to show a variety of tricks that are well executed and difficult. The judges look at falls as not only affecting the trick attempted, but also impacting the rest of the run through lost momentum. Judge also considers the competitor's intensity, smoothness and slope use, thus high amplitude and higher risk taking with excellent execution will increase a competitor's score.

TRIPLE CROWN CLUB AND UNIVERSITY RANKING:

At each event the Club and University categories will be ranked by a combined score of all their entered members competition placings points across all age categories (Under12's, Under16's, Open). Each club member will be awarded points determined by their awarded place according to this table :-
