

Name _____ Date _____

SEN Entry 1-2: Properties of Falling Stars

Name _____ Date _____

Exit Slip 1-2

Jennifer wrote an argument to answer the following question: **How are falling stars different from other rocks in our sample?**

Falling stars are different from the other rocks in our sample because they are magnetic. Falling stars are magnetic, black, and shiny. So that's how I know falling stars are different from the other rocks.

1. Evaluate Jennifer's argument by answering the questions below.

Does the claim answer the question?	☐ Yes ☐ No
Does the evidence support the claim?	☐ Yes ☐ No
Does the reasoning connect the evidence to the claim?	☐ Yes ☐ No

2. Suggest two ways that Jennifer could improve her argument. For each suggestion, revise the sentence in Jennifer's argument.

Suggestion for improvement	Revised sentence
