Use the table above to help you solve the following questions...

Complete the questions in your maths book. Remember to include your working out.

1. Who is the heaviest in the team?
2. Who is the lightest in the team?
3. What is the total weight of the All Blacks? (Do not use a calculator).
4. If you added these two players' weight together, their combined weight would be 213kg. Which two players are they?
5. Who is the oldest in the team?
6. What is the difference in age between the oldest and youngest All Black players?
7. Who is the youngest in the team?
8. If you added these two players' ages together, their combined ages are 66 years old. Which two players are they?
9. Who has scored the most test points?
10. What is the total number of test points scored by the All Blacks? (Do not use a calculator).
11. Who is the tallest in the team?
12. Who is the shortest in the team?

13. What is the difference in height between the tallest and shortest All Blacks player?

Create three of your own questions about the table above for a buddy. See if they are able to solve them!
