One of a kind, eye-catching, hand decorated and painted Japanese style paper lanterns by BEX COLLETT

Hang them anywhere! Hook a solar bulb inside the shade.

Hang up with a push pin or hook, from a beam or ribbon, inside or outside (weather permitting!)

Or easily attach to the wire of a main light source.

Benedict Hastings actspeaklearn@gmail.com

Trapped Light is the brainchild of Ben Hastings, whose work as a shadow puppeteer got him interested in painting glass. Each decoration is hand-painted and completely unique, and can be hung on windows,

alcoves, or anywhere with plenty of light. Some pieces are rich in detail, some are bold and colourful. All of them play with light beautifully and would make a one-of-a-kind gift.

Bridget Baker bridgetjbaker@gmail.com

Using galvanised wire, I make any vertebrate animal - fish, amphibians, reptiles, birds and mammal which stand about 7 - 12cm tall. Flying birds can have up to 30cm wingspan. The animals are then painted with enamel.
