Meet Echo Dot

Our most popular Echo speaker is now even better. Quite simply, just ask Alexa for music, news, and information. Drop in on another Echo device and control smart home devices with your voice. Design. Echo Dot is a voice-controlled smart speaker with Alexa.

Alexa is happy to help

Make life easier at home. Set timers, add items to lists, and create calendar events. You can also get news, weather, or traffic updates, and ask for the sports scores, movie showtimes, or restaurant hours.

Voice control more of your home

Using your voice, you can control compatible smart home devices. Switch on the lamp before getting out of bed, dim the lights from the couch while watching a movie, and raise the thermostat as you leave.

As another option, you can set up Guard for free in the Alexa app to receive mobile alerts when your Echo device detects the sound of a smoke alarm or glass breaking while you're away. And subscribe to Guard Plus to get access to an Emergency Helpline through your Echo.

Keep your family in sync

Use your Alexa devices like an intercom and talk to any room in the house with Drop In and bulletins. allow every person to understand dinner is ready, or remind the kids that it's bedtime. You may additionally make fingers-free calls to friends and family who've the Alexa app or an Echo tool in the United states, Canada, Mexico, and the United Kingdom to stay in touch with family.
