TREATMENT PHILOSOPHY:

- Each plan of care is specific to each patient
- Mind and body play an equal role in rehabilitation
- Lifestyle changes over medication changes
- Quality of care over quantity of patients
- Neurological lateralization and breathing mechanics are the basis of all treatment

CLINICAL EXPERIENCE:

- Delegation of treatment tasks to PTAs and physical therapy aides
- Discharge planning (home health, hospital, SNF)
- Multidisciplinary collaboration individually and in a group setting (case conference)
- Independent practice within 1-2 weeks in hospital/SNF/home health settings
- Treatment techniques including soft-tissue massage, joint mobilizations, modalities (estim, TENS, heat/ice)
- Use of objective measures including SPPB, TUG, TINETTI, BERG, DGI, 6MWT, 30-second chair rise
- Preparation of orders from DME including walkers, commodes, hospital beds, AFOs
- Repair and maintenance of walkers
- All OASIS-related documentation (Start of Care, Recertification, Transfers, Discharge)
- Medication reconciliation in the home-health setting

POPULATION EXPERIENCE:

- Neurological (CVA, Parkinson's, neuropathies, dementia)
- Orthopaedic (THA, THR, ORIF)
- Cardiopulmonary (COPD, lung resections, CABG, CHF)
- Misc (UTI, colostomy, end-stage renal disease, falls, chronic pain, MVA)
- Low socio-economic (transition housing)

DOCUMENTING EXPERIENCE:

Practice Perfect, Epic, Pointcare, Axxess, Devero, Rehab Optima, HealthWyse, QuickEMR, OfficeAlly, Jane
