

Scrum Template

There are 3 questions in the daily Scrum meeting:

1. What did I accomplish yesterday?

Josh- I created a plan for sprint 1 and mapped out the user stories and tasks that I will be focusing on for the next couple weeks.

Michael - Created basic functionality and UI for authentication

Aiet - added approximate time duration for the user stories i'll be working on.

Godday - Prepared to complete my section of user stories

2. What will I do today?

Michael - Fix errors running project in emulator and work on checkout screen implementation with Stripe API

Josh - Try to fix the errors that are occurring on AndroidStudio and begin to help create the checkout screen.

Aiet - fixed issues when running the application and begin the homepage.

Godday - Fix errors running the app on Android Studio.

3. What obstacles are impeding my progress?

Michael - errors surfacing when pushing to github, as well as needing to learn how to use stripe API for one-time mobile payments.

Josh - Errors occurring when I am running the project on AndroidStudio. I need to learn how to use stripe API

Aiet - the errors when I run the project are impeding my progress on the homepage.

Godday - Error with app manifest and pushing to github.

For the project we will have the 3 following questions:

1. What did I accomplish since the last Scrum?

2. What will I do until the next Scrum?

Josh - I will help create the list of restaurants in an area that are available at certain times. In the UI, the restaurants that are unavailable will be blocked out from being chosen.

3. What obstacles are impeding my progress?

Josh - Time constraint, learning how to connect a database of restaurants and how to implement their time schedules

The calendar contains the dates of each Scrum. Scrums have to be done individually. The Scrums are posted on the wiki.
