The discussion is written to interpret and describe the significance of your findings in light of what was already known about the issues being investigated, and to explain any new understanding or insights about the problem after you have taken the findings into consideration. It should connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; this section should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

The research findings in the form of research data are further discussed or critically interpreted with particular relevant theoretical approach. Data can also be supported with the presentation of tables, images, etc. Captions for table is written above it with sequenced numbering so that it can be easily referred to, though not put under the pointing sentence/ paragraph. Line (border) to the table is made minimalist by eliminating the vertical lines and leaving horizontal lines deemed necessary. Captions for images are placed below the picture, also with providing sequenced numbering. One page only accommodates a table or an image with a maximum of two-thirds the size of the page (size adjusted as efficiently as possible).
