

## CONCEPT NOTE

1. **Requisition generated by** Dept. of Civil Engineering, Adamas University, Kolkata-700126
2. **Key Issues** Project Title: Recycling of Waste Floral – An Effective Step towards the Green Future.
3. **Scope of work** The aim of this project is to propose an alternative approach to waste management since the waste will neither be land filled nor burnt but would be used as a resource that will be recycled. It will throw light on reducing volume of temple waste which would eventually generate additional revenues for temples by managing to make organic incense sticks as well as to produce organic compost as substitute of chemical fertilizer which will lead to a healthier and waste free environment. Its utilization would eventually be beneficial to the society.
4. **Benefit to the organisation** Flowers are considered as holy entities and hence are offered by pilgrims to their idols. Every day these flowers offered by the devotees in temples, mosques and gurudwaras, etc. are left unused and therefore become waste. Moreover, apart from the other applications, this flower waste can also be used for making incense sticks besides using them for some art and craft techniques. There is need to utilize these flowers for preparation of various eco friendly products.
  - i) Students involvement in the project
  - ii) Capital earning
  - iii) To create R&D and entrepreneurship motivation amongst the students
5. **Name & address of the Party** M/s. Saltee Infrastructure Ltd., AE-40, Sector-1 Salt Lake City, Kolkata-700064
6. **PAN of the Party**
7. **GSTIN of the Party**
8. **Financial Commitment** Rs.7,74,960/- for 18 months project duration.

**Date:** .....
