

## See This Report about Septic System Service

Downspouts and landscape grading that channel water onto the septic tank's drain area can disrupt its capacity to distribute water from the septic system. This can place excessive stress on the septic tank; instead, drain water from warm tubs or swimming pools into the lawn, away from the drain field - Septic System Service.

This also consists of numerous commercial sewage-disposal tank additives, which typically do more damage than good - [Septic Tank Pumping](#). Unless a relied on expert has actually recommended such an additive, don't make use of any type of septic system chemicals.

Any individual whose residence has a septic system needs to check out these guidelines on the correct upkeep of a septic tank serving houses in Anne Arundel Area. Regular inspection as well as periodic sewage-disposal tank pump-outs by a licensed liquid waste hauler are vital in the long-term treatment and upkeep of your septic tank.

A septic tank is made so that solids as well as other product work out and form a sludge layer at the base of your storage tank ([Wastewater Bulk Hauling](#)). A certified liquid waste hauler will certainly eliminate this layer to avoid any kind of solids from blocking your disposal system as well as creating early system failing. Appropriate system upkeep is the duty of the property owner.

## **The Single Strategy To Use For Wastewater Bulk Hauling**

# MAINTAINING YOUR SEPTIC SYSTEM

**EVALUATE** every 1-3 years & **PUMP** when solids reach 1/3 of tank volume

Keep all vehicles, heavy equipment and farm animals off the drainfield area. The only exception is the lawn mower.

Solids sink to the bottom of the septic tank and need to be pumped when they reach 1/3 of the tank volume.

## DRAINFIELD

Partially treated water exits the tank and is distributed into the drainfield. The soil in the drainfield removes bacteria and viruses from the liquid waste.

## SEPTIC TANK

The septic tank is buried in your yard. This is where solids and liquids separate. Installing risers from the buried tank to the yard surface can make access easier.
