☒ Self-directed	☒ Problem solving	☐ Character & citizenship									
☐ Resilient	☐ Digital & information literate	☒ Leadership									
☐ Competent	☒ Innovative & entrepreneurial	☒ Communicative & collaborative									
	Give reasons how you can develop each of these chosen attributes Attribute 1 (Self-directed): I did a project of similar nature recently during my internship, in this case, for me to run the project well, I would need to take more initiative and consider the other dimensions of the events planning that I never once considered.										

	Attribute 2 (problem solving): As someone who is running the project alone, there will be problems of a different nature which I have never encountered before which I have to deal with, I can use the chance to find out how to solve the problems to the issues that I will face during the course of the research that I am carrying out Attribute 3 (collaborative): I hardly spoke to stakeholders and I am very quiet during the course of the internship. This event will give me the chance to learn how to be comfortable to speak to stake holders by learning how to communicate and etiquette during meetings.
Brief Description of Learning Project:	What am I going to do? (max 100 words) I would like to propose programmes that would engage young people to find out more about the Singapore heritage. This could take place as online workshops or talks. To do this, I would need to learn more about the Singapore heritage, talk to stakeholders, find out what they like, and eventually run the programmes.
