

Hey Judy, your scrambled tofu recipe is something FIRE for just 545cal & 43g of protein, AND IT'S ALSO VEGAN... 🔥

I thought: "Why can't more people get jacked and stay vegan simultaneously with your App and consultations?"

After researching what your competitors & top players are doing that you don't, I found a very crucial missed part ➡ Email Series (Newsletter)

Email Series is building trust in your work, product, and company by sharing customer results, tips & tricks, recipes, and testimonials with the Call To Action at the end.

I think I can benefit your company by surprising you with the fact that I made an email example, especially for you, which you can try and see, and understand the quality of my work.

Let me know if you're ready to skyrocket your Brand, or just see what I've got.

Before we have our call tomorrow, let me quickly explain what will be discussed:

- From personal experience, ways to earn money from home without almost any effort. (I made 500\$ from it last month)
- Introduction to the latest participant of the agency (I didn't like him right away, so he's probably going to be removed from the team...)

Take your time working on it.

Ivan 🤝
