Teacher Challenges

Digital Citizenship (10pts)

General Description: In today's global society, it is imperative that students think critically, behave safely, and participate responsibly online inside and outside of the classroom. Through teaching, modeling, and personal application, teachers are able to prepare students to be 21st Century digital citizens.

(Must Complete All Levels)

Level 1	Complete Google's Digital Citizenship Course (Approximately 90 minutes at your leisure) Take and save a screenshot of the Course Progress Page showing your successful completion of all units. You will be asked to include it in the Final Reflection.
Level 2	After completing the course, design a plan to implement strategies to teach Digital Citizenship in your classroom. Consider the following questions as you plan: - Are formal lessons a requirement in creating good digital citizenship practices? - What does digital citizenship look like in your classroom? - What are your students' perspectives on digital citizenship? - How can you embed good digital citizenship practices in your classroom? Share one specific strategy you intend to employ. You will be asked to reflect on these questions in the Final Reflection.
	Digital Citizenship Reflection (Requires Screenshot of Completion Certificate)
