

Want to incorporate gender into your research? Join us for a two-part webinar series on Gender in Development. Part 1 will review different theories of household decision-making and measures related to gender in development for applied gender research. Part 2 will provide a hands-on demonstration of the Women's Empowerment in Agriculture Index (WEAI).

The AIR Pipeline Partnership Program Africa in partnership with the University of Dar es Salaam, the University of Nairobi, and the African Economic Research Consortium (AERC) Presents:

Gender in Development II: Everything you wanted to know about the Women's Empowerment in Agriculture Index (WEAI)

Join Dr. **Sudhanshu Handa**, Institute Fellow at AIR, and **Audrey Pereira**, gender specialist, for a practical session on constructing and using the WEAI in applied research. The WEAI is a multidimensional index designed to measure the empowerment, agency, and inclusion of women in agriculture. Session participants will be provided a STATA data set and programs and will be able to accompany the session leaders in constructing and interpreting the WEAI and using it to answer questions about the role of gender in economic outcomes.

The WEAI is a multidimensional index designed to measure the empowerment, agency, and inclusion of women in agriculture—read about the WEAI here (<https://www.ifpri.org/project/weai>).

Thursday, December 7, 2023

5:30 PM – 7:00 PM/EAT.
