SKILLS AND INTERESTS

- **Languages and frameworks:** JavaScript, React, Redux, React Native, CSS/SCSS, Styled Components, Next JS, Node JS, TypeScript
- **Tools and technologies:** Git, REST, PostgreSQL, ethers JS, web3 JS, viem, wagmi, Firebase, GraphQL, Vercel, Jest, Enzyme, Cypress
- **Others:** Data Structures and Algorithms, Performance Optimization, Accessibility, Responsive Web Design, PWAs, Figma
- **Soft skills:** Communication, Critical Thinking, Project Management, Problem Solving, Creativity, Teamwork
- **Interests:** Blockchain, Virtual and Augmented Reality, Mathematics, Gaming, Reading, Technical writing

WORK EXPERIENCE

Frontend Engineer at [Honey labs](#)

Sep 2021 - Oct 2023

- I was part of the initial core team, as a frontend developer, and spearheaded most of the ground work for all frontend work. After shipping the initial MVPs, the team was able to raise around \$3mil, to fund further development and ensure liquidity for the token.
- I built multiple products (frontend) from scratch like NFT staking, NFT lending, Peer-to-peer lending and Onchain Governance on several chains (Solana, Polygon, Arbitrum and BNB Chain) using Typescript, Next.js, etc. I also built pages for events.
- For this, I worked closely with UI/UX designers, as well as frontend and backend developers to deliver products in an agile way, that were highly influenced by community feedback.
- Besides UI/UX I was responsible for connecting the smart contracts to the frontend and assisted with QA testing
- Stack: React, Next JS, React Query, Typescript, Ethers JS, Solana web3 JS, Vanilla Extract CSS, Tailwind CSS, etc

Software Engineer and Mentor at Wavecrib

July 2020 - Aug 2021

- I teamed up with our skilled UI/UX designer to craft a scalable component library to enforce fluency across the application.
- I developed the frontend infrastructure (UI and functionality) for the web and mobile applications with React and React Native.
- I took the lead in onboarding and mentoring a group of enthusiastic frontend interns, guiding them through a diverse range of projects. During this journey, I prioritized the establishment of robust and well-maintained codebases, setting high standards for code quality and development practices. This not only fostered a collaborative and supportive learning environment but also contributed to the overall success of our projects, as we did our best to collectively uphold the principles of excellence and best practices.
- Stack: HTML, Javascript, CSS, React, React Native, Redux, React Router, SASS/SCSS, Firebase, etc

Software Engineer at Ravenbrooks international (NGO)

Jan 2020 - June 2020

- I revamped and modernized the organization's website to better showcase our values and make it more user-friendly and efficient. After the new website launched, it played a key role in our fundraising efforts, helping us secure a 35% increase in grants to support our mission compared to the previous campaign
- I integrated a payment system for receiving donations directly on the website and ensured compatibility for various browsers. Also surpassed initial time estimates, delivering ahead of schedule.

PROJECTS

[ENVOYER](#) - An EVM dapp to send ERC20 tokens.

Oct 2023

- Designed the user interface on figma and built it using Next JS and Tailwind CSS.
- Connected the user interface to the read data from the blockchain and interact with ERC20 token smart contracts using ethers, viem and wagmi
- Ensured operation on multiple EVM chains app (Ethereum, Polygon and Arbitrum)

[QUICKEATS](#) - A restaurant application and landing page.

July 2020

- Designed and built the landing page for the mobile app
- Designed on Figma and built the cross-platform mobile applications using React Native.
- Built server for authentication, user activities, push notification, and other activities using Node JS and PostgreSQL database and integrated Firebase media storage for storing users' images.
- Integrated users' order tracking system and on-map address picker using Mapbox's routing and geolocation API respectively.

EDUCATION

UNIVERSITY OF BENIN

Programme: Bachelor of Engineering, Chemical Engineering

Sept. 2021

Academic Standing: First Class (4.81/5.00)
