

Indoor Professional Supervision Assignment

Students are asked to view the virtual ECE preschool environment provided with a professional supervision lens. Once you have viewed the virtual ECE environment, you are asked to **identify** and **provide a rationale** to note why the environment items and objects you note are a hazard to the setting or an object of concern from a professional supervision perspective. Students will then be required to **connect** each noted area to provincial legislation (CCEYA, 2014) and/or the Code of Ethics and Standards of Practice related to professional supervision (CECE, 2017).

Please ensure that you have completed all areas in the table.

Note: your connection in the final column is simply the reference to the document(s) that you use to support your rationale. A lengthy description is not required as you have already noted the reason in the rationale column. A sample of the expectation has been provided in the chart for clarity.

[illegible]

Name the environmental hazard or object of concern	Provide a rationale. Why is the object or item an issue in your own words	Connect your response to a specific legislation component, Standard of Practice, or impact to the Code of Ethics
