

Purpose

Many old issues have been left open in between the first phase of Floodlight and the current Pivot in 2015. We are attempting to close these by either indexing them here (as they might apply to issues we arrive at during the Pivot, but don't seem to apply now), appear to be bugs or tweaks that likely need addressing during this phase, or are issues that we are re-filing under our new Pivot Milestones.

Comments to Leave When Closing or Addressing

Closed and moved to index of issues for reference during Pivot:
