

# Top-It

**Materials:** A set of number cards with four cards each of the numbers 0-10, a penny (optional)

$$2 + 5 = 7$$

**Number of Players:** 2 or 3

## Directions:

1. Shuffle the cards and place the deck number-side down on the playing surface.
2. Each player turns over two cards and creates an addition number sentence.
3. The player with the greatest sum wins the round and takes all the cards.
4. In the case of a tie, each player turns over two more cards and determines their sum. The player with the greatest sum then takes all the cards from both plays.
5. Play ends when not enough cards are left for each player to have another turn.
6. The player with the most cards wins.

**Digit Top-It:** Each player turns over one card at a time and the player with the bigger number wins that round.

**Addition with 3 Cards:** Use the same rules as for addition top-it but use 3 cards for each turn.

**Subtraction:** Use the same rules as for addition top-it but subtract the smaller digit from the larger digit. Decide before beginning if the larger or smaller difference will win for each round.

**Multiplication Top-It:** Players turn over two cards and multiply the digits to find the product. The player with the greater product wins the round. When ready for a challenge, play with 3 cards and compute the product for the three numbers.
