

How to do test corrections:

1. Multiple choice questions:

- A. Write down the question number only (do NOT write the question)
- B. In 1-2 sentences, explain why your answer is wrong (see example below)
- C. In 1-2 sentences, explain why the correct answer is correct

Example:

Question 1

Look at the food chain above. Assuming the grass begins with 50,000 units of energy, how much energy is available for the hawk?

- a. 5,000
- ✓ b. 5
- ✗ c. 500
- d. 50

[Add Comment](#)

Question 1

C is not correct because 500 units of energy are available to the frog using the 90% rule. B is correct because if you divide by 10 each time, 5 energy units would be available for the hawk

NOTE: Obviously the test won't give you the correct answer as you see above.

Short answer questions:

Re-do to receive some partial credit
