NASA [Solar System Montage](#)

Name of My Spacecraft Mission:

Name of My Solar System Object:

What are the physical features and characteristics of my solar system object?

Physical Feature or Characteristic	Data and information (use appropriate metric units)
Position/location in the solar system	
Distance from the Sun	
Diameter	
Mass	
Composition	
Rotation time	
Revolution time	
Atmospheric data	
Temperature data	
Moons/rings data	
Other data or information:	

Spacecraft Details	
Scientific Purpose of Mission	
Important Scientific Discoveries	
Name of Scientific Instrument	What does this instrument measure? (in your own words)

Spacecraft Information Card

Name of Spacecraft, Solar System Destination, Mission Dates

Image of Spacecraft

- Copyright-respectful image of your spacecraft from a reliable source

Spacecraft Details

- Scientific purpose of mission
- Important scientific discoveries
- Major scientific instruments and functions

Details here are gathered from reliable sources and summarized in your own words — not just copy/paste. Be sure that all technical terms are explained in easy-to-understand 8th grade language.

By: Your Name and Class Period

Bibliography Resources — see your Science Help Guides for proper bibliography format
