Annex I

A. Proposed indicators that meet the criteria in annex III to the Global Framework on Chemicals

Target	*Proposed indicator*[a]	*Custodian*	*Criteria met*[b]	*Divergent views*[c]
Strategic objective A – Legal frameworks, institutional mechanisms and capacities are in place to support and achieve the safe and sustainable management of chemicals throughout their life cycle.				
Target A1 By 2030, Governments have adopted and are implementing and enforcing legal frameworks, and have established appropriate institutional capacity to prevent or, where prevention is not feasible, minimize adverse effects from chemicals and waste as appropriate for their national circumstances	A1.2 Number of countries with controls for lead in paint [existing indicator] (Agreed ad ref)	WHO	☒	☐
	A1.3 Number of countries that have achieved core capacities for chemical events under the International Health Regulations (2005) [existing indicator] (Agreed ad ref)	WHO	☒	☐
	A1.4 | B6.1 Number of countries that have partially or fully implemented the Globally Harmonized System of Classification and Labelling of Chemicals [existing indicator] (Agreed ad ref)	UNITAR	☒	☐
	A1.5 Number of countries with legislation in place to manage industrial and consumer chemicals [existing indicator] ~~(Agreed ad ref) *[footnotes: Saudi Arabia requested clarification, to be provided at the next contact group session]*~~ *(on hold)*	OECD	☒	☐
	A1.6 Number of countries (parties to the Stockholm Convention on Persistent Organic Pollutants)[d] with regulatory and assessment schemes for new pesticides and/or new industrial chemicals [existing indicator, complemented by additional information from non-parties collected by the secretariat] (Agreed ad ref)	BRS and GFC[e]	☒	☐
	A1.7 Number of countries (parties to the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal)[d] that have adopted legislation to implement provisions for the control of transboundary movements of hazardous wastes and other wastes and their environmentally sound management [existing indicator, complemented by additional information from non-parties collected by the secretariat] (footnote: the scope of the GFC covers waste within the lifecycle of chemicals)	BRS and GFC[e]	☒	☐
Strategic objective B – Comprehensive and sufficient knowledge, data and information are generated, available and accessible to all to enable informed decisions and actions.				
Target B3 By 2035, stakeholders generate data on the production of chemicals, including the use of chemicals in materials and products, in addition to data on emissions and releases of chemicals and waste to the environment, making these data available and publicly accessible.	~~B3.3 Number of parties to the Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters or the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean *[existing indicator]*~~	ECE	☒	☐
Target B6 By 2030, all Governments have implemented the Globally Harmonized System of Classification and Labelling of	B6.1 | A1.4 Number of countries that have partially or fully implemented the Globally Harmonized System of Classification and Labelling of Chemicals *[existing indicator]* (Agreed ad ref)	UNITAR	☒	☐

Target	*Proposed indicator*[a]	*Custodian*	*Criteria met*[b]	*Divergent views*[c]
Chemicals in all relevant sectors as appropriate for their national circumstances.				
Strategic objective D – Safer alternatives and innovative and sustainable solutions in product value chains are in place so that benefits to human health and the environment are maximized and risks are prevented or, where prevention is not feasible, minimized.				
Target D7 By 2030, stakeholders implement measures and strive to ensure effective occupational health and safety practices as well as environmental protection measures in all relevant sectors and throughout the supply chain.	D7.2 Number of member States with national occupational safety and health profiles *[existing indicator]* (Agreed ad ref) [footnotes: member states of the ILO]	ILO	☒	☐

Abbreviations: BRS – Basel, Rotterdam and Stockholm conventions; CBD – Convention on Biological Diversity; ECE – Economic Commission for Europe; GFC – Global Framework on Chemicals; ILO – International Labour Organization; IOMC – Inter-Organization Programme for the Sound Management of Chemicals; OECD – Organisation for Economic Co-operation and Development; PRTR – pollutant release and transfer register; UNEP – United Nations Environment Programme; UNITAR – United Nations Institute for Training and Research; WHO – World Health Organization.

[a] The numbering of the draft indicators (i.e. A1.1, A1.2, etc.) agreed during the intersessional process has been retained to ensure consistency, traceability and transparency. This has resulted in non-sequential numbering.

[b] Indicator selection criteria: relevance and/or meaningfulness to the Framework; availability of data to create a baseline and to assess progress; have a designated custodian; allow for regular updating to help ensure sustainability of the measurement; allow for easy access to data and enable stakeholder participation in data collection; and data comparability through standardized methodologies.

[c] One or more members of the open-ended ad hoc group indicated they did not support the indicator as proposed.

[d] Non-parties may also provide data through the secretariat.

[e] The organization has been proposed as custodian or co-custodian of this indicator.
