ABSTRAK

Abstrak ditulis dalam Bahasa Indonesia dan Bahasa Inggris menggunakan huruf Calibri Light ukuran 10, spasi 1 dan dengan panjang teks antara 100-150 kata. Untuk artikel dalam bahasa inggris, abstrak bahasa indonesia tidak perlu disertakan. Abstrak versi bahasa indonesia ditulis menggunakan Bahasa Indonesia baku dengan ejaan yang disempurnakan. Penulisan singkatan dan rumus matematika di dalam abstrak perlu dihindari. Abstrak memaparkan secara ringkas tentang masalah, tujuan, metode, hasil dan kesimpulan.

ABSTRACT

This paper provides a template for preparing papers for production of the Journal Community Empowerment. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and to decide whether to read the document in its entirety. The abstract should be informative and completely self-explanatory, provide a clear statement of the program, the proposed approach or solution, and point out major findings and conclusions. The abstract should be 150 to 250 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article.

Article Type

Articles are original articles of research results or review results from previous articles. Articles can be written in Indonesian or English. The number of pages of articles between 10 - 12 pages includes a list of references. The systematic writing of the research article consists of title, author's name, institution and correspondence address, abstract, keywords, abstract, keywords, introduction, methods, results and discussion, conclusions and suggestions, gratitude and reference list. (AD Andriani, 2022; IS Himawan 2023). The systematic conceptual article writing (containing the results of the review) consists of the title, author's name, institution and correspondence address, abstract, keywords, abstract, keywords, introduction, core part, summary and list of references.

The title of the article is written using 16 size Calibri Light letters, capitalized, bold, Align Right, consisting of a maximum of 15 words and describing the contents of the manuscript. The author's name is written using the size 12 letters Calibri Light not accompanied by a title, the first name is abbreviated while the last name (surname) is not abbreviated. Names of authors from different agencies are marked using a superscript behind the name. Manuscripts are presented narratively (without numbering in front of subtitles) and presentation in the form of subtitles is avoided. The formula is written separately not in the sentence and equipped with numbering on the right. The formula is written using Microsoft equation.

$$x + y = 3$$

The picture is inserted in the text box and the figure caption is placed below the image. The caption of the image is numbered and the image must be referred to in the text. Captions begin with uppercase letters. Captions of images with more than one line are written using line spacing 1. The image is drawn with a line width of 1pt and should have good contrast quality.

2. METHOD

Describing the method used to solve problems, challenges or problems, answer the research objectives. This should consist of data collection techniques (including sample selection techniques, validity, and reliability of data collection tools), data analysis technique, location, time and duration of activities. In this section, Authors are required to justify the condition/situation before the programs/activities are implemented and the expected result.

Abbreviation should be explained at the first appearance and should be consistently used until the end part of the article. Please cite the previous method publication, if you refer to the published article, and explain the detail, if you modify the method.

Example of cited sentence (Dillard, 2020). Or

Based on Mamur et al. (2014) the cited sentence is.....

3. RESULT AND DISCUSSION

Result

Results are the main part of scientific articles, containing: final results without data analysis process, hypothesis testing results. Results can be presented with tables or graphs, to clarify the results verbally. Relevant documentation with a focus on community empowerment activities. The minimum resolution of photos and images is 300 dpi with JPEG extensions (.jpg).

Results must be presented correctly and accompanied by an explanation without reference to the literature. Original and important findings must be stated. Results must be illustrated with numbers or tables if necessary, but must be kept to a minimum. Detailed discussion, speculation, and interpretation of data are not included in the results, but in the discussion section. Each sub-titles have to be written in sentence case. For example “4.3 The relationship between disease activity and depression and anxiety score in patients with SLE”.

In this section, Authors are required to emphasize the analysis of the condition before and after the programs/activities of community engagement are implemented. The analysis should be completed with a further discussion on the participation of the community as well as the impacts that are gained by the community. It will be good additional content if the Authors also include the adoption of innovation by the community.

Discussion

The discussion must interpret the findings expressed in the results obtained with the background of existing knowledge (not repeat the result). The discussion must highlight what's new. Each assumption must be clearly stated. Linkages between results and the context of the target population and possible generalizations to other populations. The

advantages and disadvantages of community empowerment activities that are carried out with the conditions of the surrounding community.

4. CONCLUSION

Contains conclusions and suggestions. Conclusions include answers to research questions. Suggestions refer to the results of the study and take the form of practical actions, mention to whom and for what advice is intended. Written in essay form, not numerical form.

5. ACKNOWLEDGE

If any, thanks are addressed to official institutions or individuals who have provided funding or have made other contributions to the research. Acknowledgments are accompanied by a research contract number.

6. REFERENCES

The references consist of the author's name, year of publication, article title, city name and publishing institution. The reference list is sorted according to the first letter of the author's name (A-Z). The second word in the name agreed as a family name. Authors may follow the APA 5th Publication Manual to write references. All references referred to in the text must be written in the reference list. Preferred references are articles taken from the latest journals / publications no later than 5 years before article submission (paper submission). Example of how to write references:
