

Наукові праці докторанта Мостового С.Є. за останні 5 років

1. Netiazhenko , V., Mostovyi , S., Safonova , O. & Mikhaliev , K. (2024) Impact of Covid-19 on microcirculation and heart rate variability in patients with chronic coronary artery disease. *Fiziol. Zh.*, 70(4), 50-62. <https://doi.org/10.15407/fz70.04.050>
<https://fz.kiev.ua/index.php?abs=2065>
2. Netiazhenko, V., Mostovyi, S., Safonova, O. (2024) Correlation of intracardiac hemodynamics indicators with von Willebrand factor – Marker of endothelial dysfunction in patients with coronary artery disease combined with coronavirus disease (COVID-19). *Българска Кардиология*, 30(1), 77-84. <https://doi.org/10.3897/bgcardio.30.e116069>
<https://journal.bgcardio.org/article/116069/list/9/>
3. Netiazhenko, V., & Mostovyi, S. (2024). The role of citicoline in the correction of cerebral blood flow disorders in patients with coronary artery disease in combination with COVID-19. *Infusion & Chemotherapy*, (2), 19-25. <https://doi.org/10.32902/2663-0338-2024-2-19-25>
<https://infusion-chemotherapy.com/index.php/journal/article/view/414>
4. Netiazhenko , V., Mostovyi , S., Potashov , S., & Safonova , O. (2024). Indicators of intracardiac haemodynamics in patients with chronic coronary syndrome with concomitant coronavirus disease (COVID-19). *The Ukrainian Scientific Medical Youth Journal*, 144(1), 26-37. [https://doi.org/10.32345/USMYJ.1\(144\).2024.26-37](https://doi.org/10.32345/USMYJ.1(144).2024.26-37)
<https://mmj.nmuofficial.com/index.php/journal/article/view/6>
5. Netiazhenko, V., & Mostovyi, S. (2024). Possibility of correction of cerebral blood flow disorders and central nervous system damage with citicoline in patients with coronary artery disease in combination with COVID-19. *Infusion & Chemotherapy*, (1), 51-57. <https://doi.org/10.32902/2663-0338-2024-1-51-57>
<https://infusion-chemotherapy.com/index.php/journal/article/view/410>
6. Netiazhenko , V., Mostovyi , S., Mikhaliev , K., & Safonova , O. (2024). Possibility of correction of the blood-heart barrier damage as a consequence of the impact of the SARS-CoV-2 virus on the cardiovascular system in patients with coronary artery disease in combination with COVID-19. *The Ukrainian Scientific Medical Youth Journal*, 149(3), 93-107. [https://doi.org/10.32345/USMYJ.3\(149\).2024.93-107](https://doi.org/10.32345/USMYJ.3(149).2024.93-107)
<https://mmj.nmuofficial.com/index.php/journal/article/view/438>
7. Netiazhenko, V.Z., Mostovyi, S.E., & Safonova, O.M. (2023). The Impact of COVID-19 upon Intracardiac Hemodynamics and Heart Rate Variability in Stable Coronary Artery Disease Patients. *Ukrainian journal of cardiovascular surgery*, 31(1), 19-28. DOI:10.30702/ujcvs/23.31(01)/NM009-1928. <http://cvs.org.ua/index.php/ujcvs/article/view/546>
8. Netiazhenko, V. Z., Mostovyi, S. I., Safonova, O. M., Gurianov, V. G., & Mikhaliev, K. O. (2023). INTRACARDIAC HEMODYNAMICS, CEREBRAL BLOOD FLOW AND MICROEMBOLIC SIGNAL BURDEN IN STABLE CORONARY ARTERY DISEASE PATIENTS WITH CONCOMITANT COVID-19. *Wiadomosci lekarskie (Warsaw, Poland : 1960)*, 76(5 pt 2), 1205–1215. <https://doi.org/10.36740/WLek202305211>
9. Netiazhenko, V. Z., Mostovyi, S. I., Safonova, O. M., & Mikhaliev, K. O. (2023). MICROCIRCULATORY ALTERATIONS IN STABLE CORONARY ARTERY DISEASE PATIENTS WITH CONCOMITANT COVID-19. *Wiadomosci lekarskie (Warsaw, Poland : 1960)*, 76(10), 2224–2238. <https://doi.org/10.36740/WLek202310115>
