Abstract. The abstract, falling within the 150–250-word range, must succinctly outline the overall scope and articulate the principal outcomes achieved, methodologies applied, the significance of the work, and the conclusions drawn. It should refrain from incorporating figure numbers, table numbers, references, or displayed mathematical expressions. The focus should prioritize findings over methodologies. Adhere to the "Abstract" style, avoiding the utilization of abbreviations in this section.

Keywords: 4 to 8 words; separated by Semi-colon.

1. Introduction

Use the "Sets Paragraph" style. Setting the tone for the paper involves furnishing a distinct statement of the study, incorporating pertinent literature on the subject, and outlining the proposed approach or solution in the introduction. It should possess a general appeal capable of capturing the attention of readers across a diverse spectrum of scientific disciplines. Authors are facilitated in adhering to the necessary formatting specifications for their papers by this template, crafted in MS Word 2019. Essential elements such as margins, line spacing, and type styles are inherently integrated, with exemplars of these type styles presented throughout the document.

The bullets should be used as:

- Bullet one (Use "Paragraph - bullets") style).

Numbers/List should be:

1. Number 1
2. Number 2

2.1. General

Initially, ascertain the suitability of the template for your paper size. This template is specifically designed for A4 paper dimensions. Disregard concerns regarding the header, footer, or article content; simply insert your content into the template, substituting the existing material. Ensure precise adherence to the author's guidelines without any deviation while fitting your article into this template.

2.2.1. Comments

Precede the formatting of your paper by initially composing and saving the content as an independent text file. Maintain a separation between your text and graphic files until after the text has undergone formatting and styling. Refrain from introducing any pagination within the paper, and abstain from numbering text heads, as the template is designed to automatically handle that aspect for you.

3. Figures and Tables

C Coefficient definition

3.1. Figures - Second Level Heading

Figure captions should be below the figures. Insert figures and tables after they are cited in the text. Use "Section Breaks – Continuous" if necessary to expand a figure into one column. Figures should be inserted after their first mention. Do not use the abbreviation "Fig. X"

Figure 1. Figure caption

Use "Tables caption" style for table caption and "Table body" style for text inside the table. Tables must be in editable format. Avoid using pictures.

Table 1. Insert table caption here.

Column 1	Column 2	Column 3
Row 1	Row 1	Row 1*
Row 2	Row 2	Row 2
Row 3	Row 3	Row 3
Row 4	Row 6	Row 6

*Footnotes indicated here.

4. Conclusions

A conclusion should point out the distinguished results of the achieved work and do not replicate the abstract. A conclusion may suggest recommendations for work extension and new applications.

Acknowledgements

Authors have the opportunity to convey gratitude to pertinent agencies and individuals who have offered financial support or academic guidance to the research endeavors.

Abbreviations

A list of symbols should be inserted before the references. Sort alphabetically.

- A Coefficient definition
- B Coefficient definition

Conflict of interest

The declaration of this article's publication being free from conflicts of interest should be articulated by the author(s). The manuscript must incorporate a conflict-of-interest statement in the following manner: "The authors declare no conflicts of interest regarding the current research."

Author Contribution

For example:

- **Author A.B. and C.D.:** Formulated the research question and study design.
- **Author A.B.:** Developed the theoretical framework and performed the main computations.
- **Author C.D.:** Conducted specific analyses, and supervised the overall project.
- **All Authors:** Discussed the findings and collaborated on finalizing the manuscript.
