

```
package ywot;

import java.io.IOException;
import java.nio.file.Files;
import java.nio.file.Paths;

public class ExceptionExample {
    public static void main(String[] args) throws IOException {
        // Trying to read from a not existing file
        Files.readAllLines(Paths.get("c:/unexisting.txt"));
    }
}
```
