

Scroll of Protection from Water

(from Unearthed Arcana)

This scroll's protection extends in a 10' diameter sphere centered on the reader. All forms of water - liquid, solid, and vapor, ice, hail, snow, sleet, steam, and so forth - are unable to penetrate the sphere of protection. If those protected come upon a form of water, the substance simply does not touch them; they will not slip on ice or sink into a body of water, for example.

The protection lasts for 1d4+4 turns. Reading time is 6.
