

# **Internal Affairs Sub regiment;**

**[OOC]**

## **Data Crusaders Proposal**

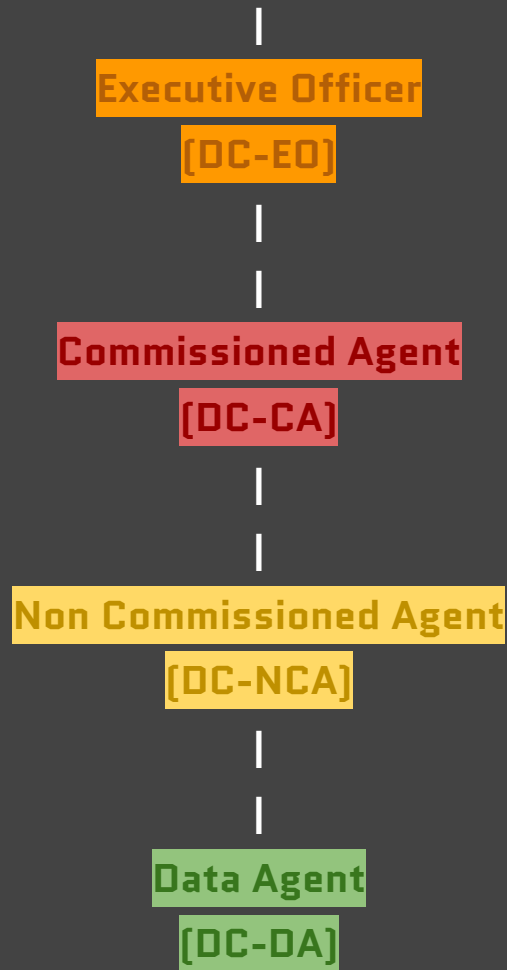

## **Chain of Command:**

**Commander**

**[DC-COM]**

|

### ***Our role:***

The Data Crusaders operate within the Department Of Internal Affairs. We are tasked with protecting data within the foundation. The goal of DC is to ensure the protection of data security inside the foundation. These specially trained operatives are the first line of defense against in site info breaches. Similar to the department of external affairs management of infobreaches, We manage info breaches within the

foundation. Of documents and more. In case ISD aren't available, this subregiment can work independently of them. However, if they are available, then members of DC can work alongside them. Agents part of DC will get heightened knowledge about the foundation.

## Documentation Review

Another Job of DC, is to review documents made by researchers, other IA agents, and documents on SCIPNET. To make sure no info breaches are taking place in these documents, and that the proper clearance level is assigned to said documents.

## Information Known

[Obviously, dealing with info breaches means you have to have more knowledge. The extended knowledge can be worked out with EC, but agents would know more about who 05 is, and on other scps like 008 and 682.]

## How would agents be picked

Agents would be hand selected based on how trustworthy they are and their reputation within IA. For example, they would be monitored and scouted ISD style to see if they are a good fit for DC.
