

Step-by-step Guide:

Embed a SoSha toolkit in a NationBuilder action page social share prompt

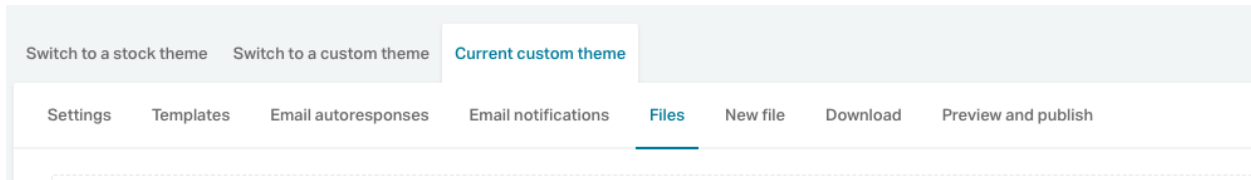

Step 1: Create SoSha Toolkit

1. Go to the [SoSha platform](#) and create a toolkit or choose an existing one
2. In that toolkit create the social media posts that you would like to be displayed on the NationBuilder action page.
3. While in the SoSha toolkit editing page, find the page URL and copy the alphanumeric 'ID' to your clipboard. You can find this in the URL immediately after /toolkit/ part of the URL and before the /posts portion.

Step 2: Adjust Custom Theme

1. Go to the NationBuilder website and create a new website or choose an existing one
2. Select the "Theme" tab
3. Click into your theme and click the 'files' tab

- a. Note: If you don't have a custom theme, you will need to [Create new theme](#) and click 'edit' to reach this

4. In your custom theme search for the `_flash_share.html` file and open it

`_flash_share.html`

5. In the html editor search for *the <div> element that contains the nationbuilder share prompt* and its closing tag. That <div> element may have a different class depending on which theme you are using. For example it is labelled as the following in various native themes:
- bootstrap: `<div class="modal-body">`.
 - Momentum: `<div class="modal-content">` (note in Momentum you will also need to remove the first 4 lines of code)
 - Action: `<div class="modal-content">`
6. Raise
7. Replace the entire code within this div block with the following snippet:

```
{% assign campaignId = "" %}
{% for tag in flash.page.tags %}
{% if tag.name contains 'sosha:' %}
{% assign campaignIdParts = tag.name | split:'sosha:' %}
{% assign campaignId = campaignIdParts[1] %}
{% break %}
{% endif %}
{% endfor %}

{% if campaignId != "" %}
{% assign uppercase_campaignId = campaignId | upcase %}
{% if campaignId == uppercase_campaignId %}
<div style="width: 100%; height: 640px; padding: 0;">
<iframe src="https://app.speechifai.tech/campaign/{{ campaignId }}?url={{
flash.page.full_url_with_recruiter | url_encode }}&wp=true"
allow="web-share" frameborder="0" scrolling="no" style="width:100.00%;
height:100.00%; -ms-zoom:1.00; -moz-transform: scale(1.00);
-moz-transform-origin: 0 0; -o-transform: scale(1.00);
-o-transform-origin: 0 0; -webkit-transform: scale(1.00);
-webkit-transform-origin: 0 0;"></iframe>
</div>
{% else %}
<div style="width: 100%; height: 600px"><iframe
```

```
src="https://app.sosha.ai/toolkit/{{ campaignId
}}?embedded=true&embedHeight=632&showFilters=&sliderEnabled=&showArrows=&
iconsColor=%23000000&postBgColor=%23FFFFFF&postTextColor=%23000000&url={{
flash.page.full_url_with_recruiter | url_encode }}"
allowfullscreen="allowfullscreen" webkitallowfullscreen="true"
mozallowfullscreen="true" allow="camera; web-share; microphone"
style="border: none; width: 105%; height: 105%; -ms-zoom: 0.95;
-moz-transform: scale(0.95); -moz-transform-origin: 0 0; -o-transform:
scale(0.95); -o-transform-origin: 0 0; -webkit-transform: scale(0.95);
-webkit-transform-origin: 0 0;" ></iframe></div>
{% endif %}
{% else %}

{% comment %}
    Put default share buttons here
{% endcomment %}
{% endif %}
```

- If you would like to create a 'fall back' in order to trigger the default share buttons, then add the original code for those buttons in place of the section:

```
{% comment %}
    Put default share buttons here
{% endcomment %}
```

- Save your changes

Step 3: Add Toolkit to Action Page Social Share Prompt

- Go to 'Pages' and select the page you would like to have the SoSha toolkit embedded in
- In the header click on 'Add tag'
- Paste the following tag: 'sosha:{sosha_post_ID}' where {sosha_post_ID} is replaced with the SoSha toolkit id from Step 1. So, it should look something like this:
sosha:98ea1234-7bc2-4217-96e1-9242d47894fc

Petition - New Bank Holiday to celebrate Scramble's birthday PUBLISHED

4. When added, the SoSha toolkit will appear in place of the usual NationBuilder social share prompt (see screenshare below). The NationBuilder recruiter functionality will still work as usual. It is possible to add the same toolkit to multiple pages.

Take the Pledge

This pledge is important. You should take it. For reasons.

If you are running into issues, would like to add more customisation to your toolkit (e.g. have multiple Sosha toolkits across your websites or conditions for when a toolkit should/shouldn't appear, please contact partners@nationbuilder.com for additional support)
