Professional Summary

With over 5+ years in the industry, I've worked at the intersection of design, strategy, and culture, building identities that don't just look good, but feel right. My focus lies in crafting meaningful brand experiences through narrative thinking, identity systems, and content design — especially for lifestyle, fashion, and future-forward brands.

What drives me is the *why* behind a brand — its tone, its emotion, its people. Whether it's directing a brand film, designing packaging that speaks, or strategizing visual language for a digital campaign, I look for authenticity and cultural relevance in everything I do.

I'm constantly exploring how design can shape behavior, tell stories, and connect people — and I love being part of teams that think bold, move fast, and create with heart.
