

# 8th Grade Weekly Newsletter

## Announcements

Welcome to 8th Grade. In the coming weeks, we will send out a weekly newsletter that will provide announcements, information, and a glimpse at the week ahead in our classes. This is the first line of communication for what is going on at school, so be sure to check here weekly. We are excited for this year and look forward to a great experience with our students.

## Guidance-Mrs.Deen

## Language Arts

## Math 8/Math 1

We are excited to welcome your students to the 8th grade hallway. This week they will spend time getting acclimated to the classroom and their new table group members. They will learn expectations and procedures for the math classroom. In addition, they will review how to plot a point on a coordinate grid.

## Science

Students will spend this first week engaging in Kagan Collaborative Structures. In addition, they will practice Claims, Evidence and Reasoning (CER) skills. Students need to return: Student Inventory, Safety Contract and any teacher specific documents!

## Social Studies
