

Chair Hoover and Maryland Public Service Commissioners,

My wish list for 2025:

- Ensure utilities provide safe, affordable, and reliable service;
- Maximize state and federal incentives for clean, efficient home heating and appliances and explore new financing options for low and moderate income families;
- Pause or end multi-year ratemaking for all utilities;
- Stop wasteful spending on polluting gas infrastructure;
- End EmPOWER subsidies for gas heat and appliances and air conditioners to focus on upgrading Maryland homes with efficient heat pumps to heat and cool our homes; and
- Engage in immediate and long-term strategic planning for our gas system.

Happy New Year!
