

Privacy Policy for InsightReel

Last Updated: July 18, 2025

Thank you for using InsightReel. This Privacy Policy describes how your information is handled when you use our Chrome Extension.

1. Information We Handle

InsightReel is designed with your privacy in mind. We do not have a server, and we do not collect or store any of your personal data. The extension works with two types of information locally on your computer:

- **User-Provided API Key:** To function, the extension requires you to provide your own API key from a third-party AI service (such as Google Gemini, OpenAI, or Anthropic). This key is saved exclusively in your browser's secure local storage (`chrome.storage`). It is never sent to us or any other party besides the AI service you have chosen.
- **Website Content:** When you activate the extension on a YouTube video page, it accesses the video's transcript. This content is read from the page and sent, along with your API key, directly to the AI service to generate summaries, analyses, and answers.

2. How Information Is Used

The information handled by the extension is used solely to provide its core functionality:

- Your **API Key** is used to authenticate your requests with the AI service you have selected.
- The **video transcript** is sent to the AI service as the basis for the content it generates.

We, the developers of InsightReel, never see, collect, or store your API key or the content of the videos you analyze.

3. Third-Party Services

All communication occurs directly between your browser and the AI provider you have configured (e.g., Google, OpenAI, Anthropic). Your use of these third-party services is subject to their respective privacy policies and terms of service.

4. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page.

5. Contact Us
