Region/ City	Northern Region/
Product + description/what do you offer	Improved Soybean seeds
What makes your business/ your product special? What sets it apart from others	Improved Soybean seeds increases yields hence helps to address SDG goal 1; Zero hunger.
Motivation to start the business	I was motivated to farm this crop to contribute to SGD goal 3; Good health and well-being of rural women who mostly farm soybean. This legume serves many nutritional purposes among rural women who have low incomes.
Objective of the business	Reduce hunger and malnutrition
At what stage is the business now? (e.g Have you started the business?) how are you running and marketing it?	The business is still at the startup stage. I have just broken even.
Which challenges are you encountering?	Stable market to supply my soybean seeds
What have been your biggest achievements?	Good yields from the farm
Next steps that you plan for your business for the next 12 months.	To stock my storage facility with more soybean seeds to serve more farmers in the next farming season
Long-term vision for the future of the business	To be a renowned soybean seed producer in the country and other African countries
Any other information about your business	More research will be done to introduce new recipes on the soybeans.
