

Community Resources

The purpose of this resource is to provide students with specific information for community resources. Bullets are suggested information to include. They are recommended but not all are necessary to complete.

*This template may be used either 1) as an instructor pre-filled reference sheet to students or 2) as a student group activity, assigning students in groups to seek out and report back (either in class or in a shared online form) the information about their assigned resources. *If using option 2, it is highly recommended to assign a meeting with faculty or administrator to learn about divisional or departmental opportunities.*
