

Hey dylan,

I came across some of your posts on Instagram and I love the design template which you used for your videos as it brings a fresh twist to my eyes.

I've got some cool ideas that could potentially benefit your business through your videos.

I've discovered that by adding motion blur and Vfx to your video, it makes your video shine even more and in turn give you more followers, more engagement which will lead to you having more sales.

Check out this video which we made for paul agencies ([link](#)).

If you're up for it, let's chat more.
