

LIST OF CCNet & CMP RALLY 2025 SESSIONS (Version January 21, 2024)

Rally content is co-created by peers as a way to share diverse perspectives and give back to our community. The proposed content was selected by the Rally planning team, largely based on pre-Rally survey responses and to balance multiple interests and topics that can advance our collective practice of conservation. We can offer a maximum of 25 sessions within the Rally program. The session for CCNet leaders, will take place the day after the Rally (on March 14). [Full schedule and session descriptions here.](#)

If you are planning to attend the Rally and are interested in contributing to or helping lead a specific session, please send an e-mail to Claire Relton or Jaclyn Lucas at CMPIInfo@conservationmeasures.org and to Cristina Lasch at clasch@tnc.org. Mention the specific session so they can connect you with session leaders. Updated information about the Rally program will be shared on the [CCNet & CMP Rally 2025 website](#).

THEME 1: Conservation Standards (CS) Guidance and Tools	THEME 2: Enhancing the Capacity of Coaches & Strengthening Our Network	THEME 3: Building Organizational Capacity (Maintaining / Adopting the CS)
Be in the Know about 5.0	Inspire, Guide, Empower: Crafting mentorship for adaptive management	Maximum Collective Impact - how to embed the Conservation Standards in organisational strategy and optimise the programme portfolio
Reflecting and Adapting - what's new? and... what's old?	The Council of Cool: CCNet Regional Network & CoP Leadership (this will take place on March 14, after the Rally)	News you can use! - Complementing the CS with other tools and frameworks
Guidance and Experiences with Climate-Smart Conservation Planning		The valiant journey: adopting and adapting the CS in organizations
Mapping Our Way: Geospatial approaches across the Conservation Standards		
Picking feasible and compelling goals and metrics to define organizational and project strategies		
The Foundation of Adaptive Conservation: Designing Effective Target Health Assessments		
THEME 4: Planning with Indigenous & Local Peoples and Community-based Resource Management	THEME 5: Protected Area Management	THEME 6: Knowledge, Technology & Skills for the Emerging Future
From do no harm to do more good: how to integrate (social and environmental) safeguards in the cycle for more equitable & sustainable impact	How can CMP and CCNet best engage with the IUCN Green List process for assessing and certifying protected area effectiveness?	Leveraging technology for conservation
Building and Sustaining Trust with Diverse Communities	Getting ready to coach the restoration standards. Join us!	Knowing what works, and when: Building an evidence base for conservation
Resilient Communities, Adaptive Plans: Approaches and frameworks to Indigenous people and local communities Land Autonomous Management	Our huge opportunity: Using the focus on 30 x 30 to better integrate adaptive management principles and practices into protected area management and effectiveness assessments	Navigating Policy Engagement: Insights and Tools to Support CS
Indigenous-led conservation in the context of the Global Biodiversity Framework and beyond		On Our Best Behavior: Recent advances in integrating behavior change principles and practice into the Conservation Standards
		Leveraging AI for Conservation
		Taking Conservation to Scale: A framework for using the Conservation Standards to help develop explicit scaling plans
		Beyond Diagramming: Using all of Miradi's tools to support ongoing Project & Program Management
		Measuring What Matters: Conservation Monitoring Effectiveness Techniques (COMET)
