

Name _____ Lit. Sci. 2 Colorado Fossils and Mammals Questions

Non-avian: Not birds, unable to fly

Concretion: a hard solid mass that has accumulated much local matter (stuff).

Avarice: greed

In a full paragraph (at least 6 sentences), what the mammal fossils tell us about how the asteroid hit affected mammals at the time and over the next million years. What do other fossils indicate may have helped this development? If you are quoting, use notes, but be sure that most of the paragraph is in your own words.

In a full paragraph (at least 6 sentences), explain what the end of the article says about how these discoveries might be useful for understanding the near future on earth. What is the crisis that they are thinking about in this sense?. Use your own words unless you are quoting. If you are quoting, use notes, but be sure that most of the paragraph is in your own words.
