JD For NOC Engineer

Job Title: NOC Engineer

Company: [Company Name]

Location: [City, State]

Job Description:

We are seeking an experienced NOC Engineer to join our team. The successful candidate will be responsible for monitoring and managing the organization's network infrastructure, as well as providing technical support to end-users. This is a full-time position that offers a competitive salary and benefits package.

Key Responsibilities:

- Monitor and manage the organization's network infrastructure
- Provide technical support to end-users
- Troubleshoot and resolve network issues
- Collaborate with other teams to identify and implement network solutions
- Identify and respond to network incidents and implement appropriate countermeasures
- Provide training and education to employees on network best practices
- Stay up-to-date with the latest network trends and technologies
- Ensure compliance with legal and regulatory requirements

Technical Competency Requirements:

- Strong understanding of network protocols and technologies
- Experience in network management and maintenance
- Experience with routing and switching protocols
- Experience with firewall and VPN technologies
- Familiarity with industry standards and best practices
- Strong analytical and problem-solving skills

Behavioral Competency Requirements:

- Strong attention to detail and ability to meet deadlines
- Excellent written and verbal communication skills
- Proven ability to work independently and as part of a team
