

# Eclipse IoT Working Group Call

Minutes, May 26, 2020

## Agenda

Add agenda points at any time in the [permanent agenda](#) document.

1. Virtual Day and Developer Survey
2. New members
3. [Eclipse Arrowhead](#) Introduction by Jerker Delsing
4. Testbeds
5. Varia

## Attendees

Benjamin Cabé  
Laurent Carré  
Ian Craggs  
Jerker Delsing  
Frédéric Desbiens  
Christian Glomb  
Kilton Hopkins  
Sven Jeroschewski  
Kevin Olotu  
Alois Zoitl

## 1. Virtual Day and Developer Survey

The [Eclipse Virtual IoT and Edge Native Day](#) is scheduled for May 28, 2020. The event will showcase several members of the Eclipse community.

Our annual [IoT Developer Survey](#) will run until June 26, 2020. Please help promote it.

## 2. New Members

The following Eclipse Foundation associate members requested guest membership in the Eclipse IoT working group:

- The **DASH7 Alliance** is a non-profit mutual benefit organization formed to foster the existence and the further development of the DASH7 protocol specification (based on ISO 18000-7). The DASH7 Alliance Protocol (D7A) is an Open Standard for bi-directional, sub-GHz medium range wireless communication tailored for ultra lower sensor-actuator applications using private networks.
- Open Source Robotics Foundation, Inc. (OSRF), operating under the name **Open Robotics**, is the non-profit driving the popular Robot Operating System (ROS), a set of software libraries and tools targeted at robot applications.
- **Topio Networks**, a media organization behind the Edge Computing World conference, among other things.

## 3. Eclipse Arrowhead

Jerker Delsing delivered an exhaustive presentation on the [Eclipse Arrowhead](#) project. The Arrowhead Framework provides support for building IoT-focused systems of systems (SoS) based on service-oriented architecture patterns.

## 4. Testbeds

In previous discussions about the Eclipse IoT testbeds, community members mentioned that we lack a proper definition of what a testbed is.

Frédéric Desbiens put together a proposal to address this issue. It will be discussed at the June meeting.
