

Health Industry Outreach Proposal Statement *(alter for your region)*

Citizens' Climate Lobby *(name)* Chapter requests *healthcare system*:

- sign the Business Leaders' Letter to *Your Member of Congress* requesting Representative *Your Member of Congress* join the [Climate Solutions Caucus](#); and
- if interested, sign the [Community Leader's Letter to Congress](#) endorsing carbon fee and dividend and/or action on climate change.

We believe these would be beneficial to *healthcare system* because:

- Action on climate change is necessary to protect the people and communities that *healthcare system* serves and it aligns with the *healthcare systems'* mission, vision, and core values ([see Customizable Faith-Based Healthcare System Outreach Document](#)).
- Taking action to stop climate change is in step with other organizations in the health industry ([see Health-Related Organizations' Positions on Climate Change](#)).
- There is growing conservative, Republican, and bipartisan work to find solutions to our changing climate. *People of state/district* need *MoC* to represent us and our concerns in those discussions. ([see businesses that support carbon pricing](#), prominent [conservatives supporting carbon pricing](#) and [supporters of carbon fee and dividend](#)).
