

## Concurrent Enrollment (CE) and Dual Enrollment Classes Satisfying Postsecondary Reading, Writing and Communicating and Mathematics Competency Demonstrations

The Colorado State Board of Education (and subsequently the Adams 12 Board of Education) formally adopted a [menu](#) of college and career-ready demonstrations that students must use to show what they know or can do in order to graduate from high school. Students must demonstrate college or career readiness in Reading, Writing and Communicating and Mathematics based on at least one measure. One of the menu options is Concurrent Enrollment (CE)/dual enrollment. Created in 2009 by Colorado state statute, Concurrent Enrollment allows for the simultaneous enrollment of a qualified student in a secondary school (e.g., high school) class and in one or more postsecondary or college courses. Concurrently enrolled students simultaneously earn high school and college credit at no tuition costs to students. Dual enrollment courses are offered through partnerships with local colleges, and college credit is awarded to students at a nominal tuition cost that the student is responsible to pay.

Below are two tables outlining the list of Adams 12 approved CE and dual enrollment courses for demonstrating college or career readiness in both Reading, Writing and Communicating and/or Mathematics by earning a grade of D or higher.

**As course offerings are dynamic, this list will be updated on an ongoing basis.**

***IMPORTANT:*** *These courses are not offered at all schools, every year. Please consult each school's registration guide for a list of current course offerings.*
