

Name: _____

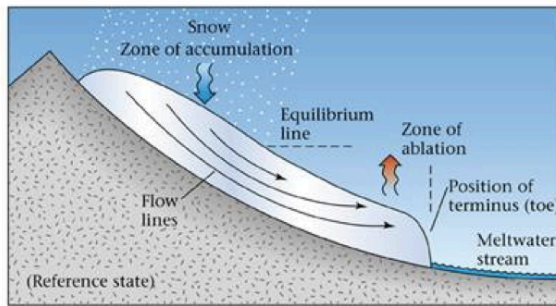

Question 1. Please watch How Do Glaciers Move? @ <https://youtu.be/RnIPrdMoQ1Y> (7:03-minutes). This video is a great summary of what we covered in-class.

A 'golden line' is the sentence or two that you think best captures the essence of the video OR that you found particularly compelling and thought provoking. For videos it may be a compelling visual rather than a specific statement - here you can describe the visual and record the time stamp.

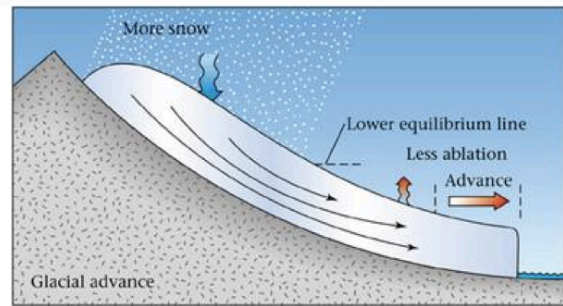

Select your 'golden line' from the video (see instructions above) and type and/or describe it below.

Why do you think this is the 'golden line' of the video? Please explain!

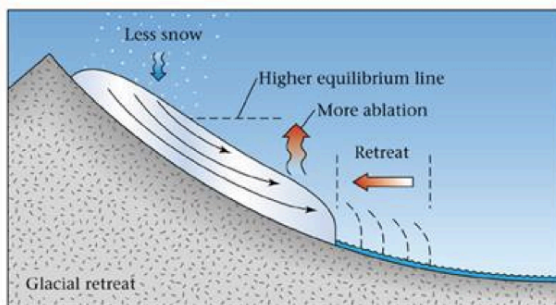

Question 2. Use the following three figures to explain and discuss the connections between climate change and the advance or retreat of glaciers. Use extra sheets as needed.

(a)

(b)

(c)
