

# Welcome to 6th Grade Advanced Math!

## Starpoint Middle School

### Our Math Curriculum:

1. Ratios, Unit Rates and Proportional Relationships (grade 6 and grade 7)
2. Rational Numbers (grade 7)
3. Expressions and Equations (grade 7)
4. Circles (grade 7)

### How will I be graded?

Each assignment you complete will be given a specific whole point value. Your grade will represent the part of the whole number of points you earned. Ex: 9 out of 10 points on a quiz.

### Homework Policy:

All homework assignments are due on the scheduled day and will be reviewed in class. Late work will lose 10% when turned in a day late. On the second late day, it will become a zero.

### Advanced Math Requirements:

Students in the Advanced Math program at Starpoint Middle School are required to keep an 85% or better cumulative average. Teachers will look at the overall grade as well as homework completion and effort to continue in this program.
