

How do these work?

Choose one of the AGWs, Contact me with a character, can be yourself (or your ID), an Original Character, or a character from any established franchise, then pick up the traits you'd want for each of these, at the bottom of the instructions you can see links to the results of these events, serving as examples.

ARTIST GIRL WATER 1.0 'MENTALCRASHIFICATION' EFFECTS

Physical Traits:

- Feminization <- Guaranteed Effect if the character is male.
- Some clothes changing*
- Some clothes changing*
- Haircut
- Hair colour
- Skin colour
- Glasses
- Height change (Depending on the character)
- Dark Circles under eyes
- Wide hips
- Eye colour**
- Mole**
- Ankh necklace**

*The Clothes changing option is repeated since by picking one some of the clothes would change, by choosing both all of the clothes would change.

**These three would only count as one slot since they're small changes, is not mandatory that you pick all three of course.

Mental traits:

- Vampire-esque sleep schedule
- Art Skills
- Addiction to coffee
- Workaholicness
- Perversion

Extras:

[Spiked Milk](#) - Causes AR

[Spiked Ice Cream](#) - Causes WG

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Sketch-Batch-10-Artist-Girl-Bath-Water-807659761>

ARTIST GIRL WATER 1.1 'NERDIFICATION' EFFECTS

Types of Nerd (Can be combined of course, these are just examples):

Hikikomori: Social recluse, NEET type of girl who would rather stay home, wear whatever, bath whenever and spend all day browsing the internet and playing videogames.

Classic: Thick framed glasses, braces and an oversized school uniform, library rat, maybe a fan of D&D who collects figures.

Fujoshi: Japanese for "Rotten Woman", usually a variation of Hikikomori, obsessed with Yaoi (Gay Manga/Anime). Basically the female equivalent of a male otaku, the type of girl who would have a dakimakura of a male character.

Otaku: Anime/Manga fan, the type who does cheap cosplays she never looks good in, has a large collection of manga, figurines and accessories.

Weeaboo: Western equivalent of Otaku, but the type who obsesses with anime accessories and uses poorly translated Japanese words.

Traits (Again these are just examples, you can suggest more if you think of more):

Physical:

Fat, Messy Hair, Greasy Hair, Greasy Skin, Pimples, Dark Circles Under Eyes, Chubby, Petite or Lanky Body Type, Hairy Body, Snotty, Poor Hygiene, Poorly Dyed Hair.

Personality:

Perv, Shy, Squeaky Weeaboo (The type that shouts anime words like "Sugoi" or "Baka").

Clothing/Accessories:

-D&D Items like Boards, Dices and Figurines, as well as things like MTG Cards, Vehicle Models, etc.

-Cheapest clothes, oversized clothes, poorly buttoned clothes, untied shoes.

-Braces, glasses, Inhaler for asthma.

-Anime accessories like Neko tiara, Anime face mask, Naruto forehead protector, Nezuko Mouth Bamboo, etc.

-Anime merchandise like manga, doujins, figurines, shirts, etc.

-Videogame merchandise like consoles, games, controllers, figurines, shirts, etc.

Advice:

-Pick traits that'd still make your character's former self somewhat recognisable when put side to side.

-Don't make the character a complete monstrosity by adding every single trait.

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-14-1-Nerdification-821536202>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-14-2-Nerdification-821536361>

ARTIST GIRL WATER 1.2 'HEXIFICATION' EFFECTS

Features:

The features will mean how many of Hex Maniac's elements will be incorporated into your characters:

Obligatory features:

- Facial expression
- Eyes
- Personality

Pick two of these features:

- Hair style
- Hair colour
- Skin Tone

And two of these of these features:

- Clothes style
- Clothes colour
- Accessories (Hair Band, Painted Nails)

Optional Accessories:

- Pokeball
- Purple Handkerchief
- Hex Book
- O-Fuda
- Whatever you suggest that fits the character.

Up to the commissioner

- Hair Length
- Chest Size

Extra Detail - Pokemonifying:

This will require adding in extra characters, so you feel free to pair up with other person if you want. If someone commissions their character being turned into Hex Maniac, you can commission yours being turned into her pokemon, prices would be the same, but it'd be a fun extra if you're interested, only rule of course would be that it'd be exclusive to Ghost or Dark Type pokemon, or at least some Pokemon you could see Hex Maniac training.

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-16-1-AGW-1-2-Hex-Maniac-823856274>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-16-2-AGW-1-2-Hex-Maniac-823856277>

ARTIST GIRL WATER 1.3 'IMPIFICATION' EFFECTS

Features:

Here's something different from the previous events though, since Midna has such distinct features the only obligatory feature will be keeping the hair colour and hairstyle, the rest would be just a set of suggestions you can pick from to make sure the character looks impified while retaining enough of their original self to make it identifiable, even if just partially, so:

Obligatory Features:

- Hair Style and Colour

Suggestion Features:

- Keep Accessories like glasses, earrings, scarves, hats, etc.
- Keep a piece of clothing to make it look baggy, like a jacket.

Up to you:

- Change the colour of the glowing lines to a colour of your choice, as long as it glows.
- Amount of thickness and overall body fat.
- Hair hand like the real Midna.

Extra Optional Feature:

- Extra Tiny Imp with Wings and Tails ([Example](#))

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Sketch-Batch-18-1-AGW-1-3-Impification-828299319>

<https://www.deviantart.com/mentalcrash/art/Sketch-Batch-18-2-AGW-1-3-Impification-828300184>

ARTIST GIRL WATER 1.4 'MILFIFICATION' EFFECTS

Features:

The features this time will work more or less as suggestions, more or less since the characters would clearly need to have a mother body type. Do check the "Extra Details" bit below though, since there are some topics you might be interested into.

Physical:

- Long hair
- Short but feminine haircut
- Large breasts
- Wide Hips
- Slight waist fat
- Slight tired look of a hardworking woman.
- Keep the Clothes or reshaping them into woman clothes.
- Pregnancy (Or maybe holding a + Pregnancy Test)
- Accessories such as earrings, marriage ring, etc.

Mental:

- Caring mother type
- Sexually Needy mother type
- Karen

Extra Details:

Mother and Child:

An extra detail would be having two characters transform, one as the mother with the other as their child, of varying ages up to you, anywhere from newborn to prepubescent.

Hey kid, wanna ss?:

You're familiar with this concept? Then well, know you can ask for it, just don't ask for anything actually lewd... Fine fine, I'll explain what it is, I'll be willing to draw characters romantically involved with kids, but by romantically involved I'd go with tight hugs, fondling or kissing, nothing going overboardly lewd.

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Sketch-Batch-20-1-AGW-1-4-Milfication-831835918>

ARTIST GIRL WATER 1.45 'ONEE-SANIFICATION' EFFECTS

Features

There's archetypes from general types of sister as well listed below from which you'll have to pick, the physical traits as well as accessories you want are up to you, but must fall in line with the three archetypes, if you want a character different to the three archetypes feel free to suggest it. Note though that archetypes can be combined if you want. Do check the "Extra Details" though, there are some topics you might be interested into.

Archetypes:

- Caring Sister: More of a mother substitute type, the type of sister who'd be there to help you out at home and be someone you can confide on.
- Delinquent/Tomboy Sister: Boyish attitude, maybe even boyish clothes, the type of older sister who would beat the shit out of your bullies, then beat the shit out of you for not standing up to yourself. Also good at sports, or at least better than you.
- Teaser/Pervert: Ara Ara~ Obvious archetype, the type of sister who wouldn't shy to tease you on the fact she knows more about puberty than you do. And would likely also tease you for playing videogames and watching videogames all day.

Physical Traits:

- Long hair
- Short but feminine haircut
- Large breasts
- Wide Hips
- Keep the Clothes or reshaping them into woman clothes fitting for her age.

Accessories:

- School books/backpack, big sis might be older than you but she still needs to study
- Vogue teen accessories, whatever is popular amongst teenager girls.
- Sport Accessories/Balloons if she's a sports girl.
- Videogames, if she's into them.

Extra Details:

Big Sister, Lil' Sibling:

An extra detail would be having two characters transform, one as the sister with the other as their little sibling, either brother or sister, ages can vary anywhere from infant sibling to just slightly younger.

My lil' brother can't be this cute:

I'll be willing to draw mild incest scenes, by mild I'd go with tight hugs, fondling or kissing, nothing going overboardly lewd.

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-22-AGW-1-45-Big-Sisterification-835294237>

ARTIST GIRL WATER 1.5 'GIRL-SCOUTIFICATION' EFFECTS

Features

The features in these are pretty straight forward, the character would get regressed unless they're already a kid and would get turned into a girl unless they were already one.

Uniform, Accessories and Cookies:

As you can see in the examples, the uniforms are the same, if your character has a hat they can keep it, if they don't they'll have to wear a beret. The plaid skirt's colours vary depending on your character's clothes, [SomariaMoon](#) usually wears a red shirt and blue jeans, which is why you can see these colours on her skirt in [this example picture](#).

There's also the sash, with medals and pins which design is entirely up to you, you let me know what you want in it and I'll add it.

Since the character would be regressed I can add in things such as braces or a lisp if they're speaking, entirely up to you, if you have any other idea for a good option there feel free to mention it.

Your character can either have some cookie boxes for sale or not, it's up to you, same with the colour of the boxes and the cookie types, not being picky there.

Same with the cookie they eat, I used the standard chocolate sprinkles cookie but you can go with whatever type you like best.

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-24-1-AGW-1-5-Girl-Scoutification-839266204>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-24-2-AGW-1-5-Girl-Scoutification-839266413>

ARTIST GIRL WATER 1.6 'HUCOWIFICATION' EFFECTS

Features

There are traits listed below whether or not they're obligatory, like most of the physical ones as well as the cow bell accessory, which can be coloured or customized at your leisure. Each HuCow must of course somewhat resemble their previous self whether or not that previous self is drawn. You can see examples of HuCows by going [here](#).

Obligatory:

- Cow Ears, Tail and Horns (Shape of the horns is up to you).
- Big breasts, anywhere from large to ridiculously large.
- Mild to very noticeable weight gain.
- Cow Bell
- A penchant for mooing.

Optional:

- Cow girl themed clothes, farmer overalls, cow spotted bikini, etc. Nudity is also an option.
- An ear tag, the colour of which is up to you
- Nose ring
- Hooves instead of feet
- Vacuum tubes or flask (See Extra Details)

Personality (Multiple can be selected):

- Lazy
- Careless
- Easy going
- Motherly
- Horny (Pun intended)
- Dumb
- Glutton

Extra Details:

-Lactation is also an option in this event, whether it's dripping milk going to waste, suction tubes or flask, the HuCow drinking her own milk or feeding a second character.

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-26-1-AGW-1-6-HuCowification-842777941>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-26-2-AGW-1-6-HuCowification-842778818>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-26-3-AGW-1-6-HuCowification-842779994>

ARTIST GIRL WATER 1.7 'SPLATOONIFICATION' EFFECTS

Features

The characters are obviously supposed to turn into Splatoon characters, which are both [Inklings and Octolings](#), whichever you want your character to be is your choice, though it'll of course be better to keep some balance. Another important detail is that the character must somewhat resemble their former selves whether or not that former self is drawn. You can see an example pic [here](#).

Obligatory:

- An ink colour
- Hairtacles
- Black border around eyes
- Splatoon Teeth
- Age being around 10 to 14 y/o

Optional:

- [Inkling or Octoling](#)
- Gender
- Whether they just sort of transformed or if they're shot full of ink into their new form.
- In-Game weapons (Might increase price) Examples: [Main](#), [Sub](#), [Special](#)

Extra Details:

-Squid/Octopus Form: For 25 USD I can add a Squid/Octopus Form, for those unfamiliar with the game, you can see the example of said forms [here](#). The players use it to traverse through the ink. It'd of course be customized to look a bit more like your character but it'd still be fairly simply drawn.

-Interactivity: Splatoon is a competitive game, if you want to be fighting other players by shooting ink at them that's something you can coordinate with people.

--

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-28-AGW-1-7-Splatoonification-845810173>

ARTIST GIRL WATER 1.8 'PEACHIFICATION' EFFECTS

Features

The idea of this event will be to have a character of your choice wear the Super Crown, same as previous events, you provide a character, which can be yourself, an OC or any character from an established franchise, the base character can be male or female, but the crown causes Peachification, so any male character will be turned female. You can see an example pic [here](#).

What's the "Water" element in this AGW I wonder... Was it used to grow the mushroom inside the crown?

Obligatory:

- Dress similar to Peach in design, some bits of it's design can be altered but the overall design should resemble the base, the colour should though resemble the base character.
- The Crown of Course

Optional:

- Chest Size is up to you, Peach tends to be well endowed, but that can vary with the character you provide.
- Hairstyle changing to Peach's
- Hair changing colour to blonde like Peach's

--

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-30-1-AGW-1-9-Peachification-849092919>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-30-2-AGW-1-9-Peachification-849093547>

ARTIST GIRL WATER 1.9 'SPORTY GIRLIFICATION' EFFECTS

Features

As you can guess this event will be all about Sport Playing girls, which can be anything ranging from ball games (Football, Tennis, Basketball, Baseball, etc.) to olympics (Running, Jumping, Swimming, Lifting, etc.) and fighting (Wrestling, Kung Fu, Boxing, etc.)

You can see examples here: [1](#), [2](#), [3](#), [4](#), [5](#)

So quite simply what you'd have to pick is a sport of your choice for your character, body type is also your choice, though they'd at least need to be somewhat physically fit. The accessories are all suggestions you can pick from, though of course if you want your character to show that they play some sport they'd need either the uniform or item fitting for said sport.

And this of course being Sporty GIRLS means all characters must be female, this also means of course if you have a male character drinking the AGW they'll become female.

Physical Traits such as hairstyle and length, chest size, etc. are all up to you.

Accessories:

- School books/backpack if they're still high school/college sports players
- Sports Uniform, things like Varsity Jackets, Kung Fu Gi, etc.
- Ball, Gloves, Bat, Pole, AKA whatever fits to whatever sport.

Small Extra Detail:

The standard colour of the bottle is orange, but it can be altered to fit the sport better, I went with Green for tennis players, Red for wrestlers and I guess blue will be fitting for swimmers, but in the end whatever colour you like best can be used.

--

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-32-1-AGW-1-9-Sporty-Girlification-852749192>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-32-2-AGW-1-9-Sporty-Girlification-852749700>

ARTIST GIRL WATER 2.0 'KINDERGARTENERIFICATION' EFFECTS

Features

As it's quite obvious, those who eat the applesauce will get regressed to kindergarten age! The outfit they'll use will be up to you, you have the standard Japanese Kindergartener with the hat included like in the example photo, but if you want to use a kindergarten uniform from any other country just link it over. The characters can be just Age Regressed or TG+ARed if you want. Baby accessories such as a diaper and pacifier are up to you, depending on how far back the character is regressed. You can see an example here: [Hina Hana Chan](#)

Physical Traits such as hairstyle and length, height and other details such as them missing teeth or having scraped knees with or without bandaids, since as you know you just can't keep these kids quiet :v

Accessories:

- A backpack or handbag to carry all their lil' school supplies.
- School supplies, duh, all their Tempera, Crayons and Safety Scissors (Don't run with them)

Caretakers:

You can't expect a Kindergarten to be nothing but children, it'd be total chaos! So a few of the character slots will be available for caretakers, which is why this pic has Age Progression tags :v if you have a character you wanna turn into a [Kindergartener Teacher](#). There'll be a **very** limited amount of these though.

--

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-34-AGW-2-0-Kinderification-855441677>

ARTIST GIRL WATER 2.1 'STEPFORDIZATION' EFFECTS

First Off, what is a Stepford Wife?

It is a common fetish concept, a 50s type perfect wife, from the chauvinistic point of view, an easily pleased housewife who wouldn't concern with anything other than taking care of her household and keeping her husband pleased. It can be referred to as some subcategory of Bimbofication, though it's kinda specific.

Stepfordization of course means a character turning into a Stepford Wife, so strong willed characters would be prime targets, think something like this: [Housewife Caelia](#)

Features

- For hair, just think of a nice, feminine looking hairdo. If it's elaborate or not it's up to you.
- For body type, well endowed or not is up to you, just as it also looks quite feminine. Fat or Skinny is fine, whatever pleases her hubby.
- For mental traits, a Stepford Wife isn't really known for their intelligence, but they'd be quite good house keepers, cooks and husband pleasers.

Clothing and Accessories:

- A Stepford Wife would of course want to dress properly, whether to be a good housekeeper or just to look pretty, so dresses are kind of a given. Unless your Stepford Wife is trying to look sexy for her husband.
- Other accessories would of course include jewelry, cheap or not is fine, not like a Stepford Wife would know.
- Other accessories would be housekeeping or cooking ones depending on what she's doing, washing dishes, dusting the furniture, vacuuming the floor, baking a pie, hanging the laundry, etc.

Family:

A happy household should have some kids, so if your Stepford Wife has been productive you can add some kids for her to be taking care of. A husband as well if you feel like adding a classy hunk.

—

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-39-AGW-2-1-Stepfordization-870146682>

ARTIST GIRL WATER 2.2 'CAVE STORY' EFFECTS

Cave Story is a classic of indie gaming from 2004. I greatly recommend this game even today, while you can buy it on several platforms, it is a freeware game, so it is perfectly legal to download it for free. What does anthro bunnies and white androids with jetpacks have in common? What? You don't know? Well, it's Cave Story, Doukutsu Monogatari, 洞窟物語.

What is a Mimiga?

They are an NPC race of anthro bunnies you meet throughout the game, almost always white, there was just one exception too with a purple bunny, so while white would be the preferred colour they should be, if you want yours to be coloured different is your choice. Funnily enough some of the Mimigas you see in the game are actually transformed humans. You can see examples of their appearance in [these pictures](#).

You mentioned Androids too?

Yes indeed, the protagonist of the game is known as Quote, a boy Android, a female Android known as Curly Brace shows up later in the game as well, so if Bunnies aren't your thing you can go for an android character as well, like the mimiga, the Android's "skin" should be kept white. You can see examples of the Android's appearance in [these pictures](#).

Features

For the Mimiga:

- White fur, bare feet.
- Eyes can be any colour but should preferably not be red, if you play the game you'll know why, I don't wanna spoil things :y

For the Androids:

- White "skin"
- Green earpieces
- Blue Eyes
- One or several clothing parts being red coloured.

Other things

- Another character you meet in the game is Misery, an evil witch, if you'd rather go with a character designed after her, but Mimigas and Androids should be the main thing, you can see examples of her appearance [here](#).
- You find several different types of weapons in the game, if you're familiar with them they can be added to your character, but depending on their complexity I may have to charge extra.

—

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-43-AGW-2-2-Cave-Story-8756277>
[85](#)

ARTIST GIRL WATER 1.65 'HUCOW+' EFFECTS

The topic is mostly the same as the AGW 1.6, Kemonomimi Cows, or HuCows, Human Cows, Ushimimi, Cow Girls, 牛娘, etc. But in this one you also have the option of Anthro Cows and Miltanks, should you prefer to go with either. You can see examples of all the HuCows I've drawn to date by going [here](#).

And more example of the categories here: [Ushimimi](#), [Anthro](#), [Miltank](#)

Features

Obligatory:

- Cow Ears, Tail and Horns.
- Big breasts, anywhere from large to ridiculously large.
- Mild to very noticeable weight gain.
- A penchant for mooing.

Optional:

- Cow girl themed clothes, farmer overalls, cow spotted bikini, etc. Nudity is also an option.
- Cow Bell (Can be coloured or customized at your leisure)
- An ear tag, the colour of which is up to you
- Nose ring
- Hooves instead of feet
- Vacuum tubes or flask (See Extra Details)
- If Anthro, Udders or no udders is optional, but it'd make more sense if they did have them.

Personality (Multiple can be selected):

- Lazy
- Careless
- Easy going
- Motherly
- Horny (Pun intended)
- Dumb
- Glutton

Extra Details:

-Lactation is also an option in this event, whether it's dripping milk going to waste, suction tubes or flask, the HuCow drinking her own milk or feeding a second character.

--

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-45-1-AGW-1-65-Year-of-the-HuCo>

[w-878743270](#)

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-45-2-AGW-1-65-Year-of-the-HuCo-w-878743528>

ARTIST GIRL WATER 2.3 'MERMAIDIFICATION' EFFECTS

This event is kinda more straightforward than the past couple ones. As Mermaids are creatures basically everyone is familiar with.

As it's obvious the idea of this event is to turn the character of your choice into a mermaid, it can be yourself, a character you've created or one from an established franchise that you just so happen to want to see mermaidified.

Tail Design

If you want something simple for your mermaid's tail I can adjust to the character's palette, if you want an specific original design or a real fish's design you can go with a type of fish you like and I'll add it, like in [this picture](#), where the tail is from a Koi carp. So if you wanted something specific, like a Sturgeon, Clownfish, Butterflyfish, Lionfish, etc. It's up to you.

Optional

- Ears can be human or have fishnets, like in [this picture](#).
- Hands can also look normal or have webbed fingers, like [here](#).
- Gills can also be added to the neck or torso if you'd want them.

What if I wanted a Merrow instead?

I mean... Sure, for those unfamiliar, a merrow would look more animalistic than the standard mermaids. Like in [these examples](#). If you wanted something more exotic like [Mother Kos](#) I could also go with that.

Tentacles

A quick and easy to explain thing, if you'd rather have octopus/squid tentacles instead of a fish tail, something like Ursula from The Little Mermaid, that'd be fine too.

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-47-AGW-2-3-Mermaidification-881495007>

ARTIST GIRL WATER 2.4 'POKEMONIFICATION' EFFECTS

I kind of did a Pokemonification event before with the [AGW 1.2](#), but that was only focused on [Hex Maniac](#).

SO! This is of course a Pokemonification Event, but you'll get to pick from three variants:

Pokemonification

You can simply get a pokemon of your choosing for you, your OC or a character from an established franchise to turn into. You can see plenty of examples of Pokemonification I've drawn in [this folder](#).

Anthro Pokemonification

Easy to explain, same as the above, only in the anthro/furry variant.

Trainer

If turning into a pokemon isn't your thing, then just be the trainer instead, have you turn other people even, maybe capture them? Why not. It can simply be your character with trainer gear, but you can also go with any of the trainer designs from the games.

Regarding Design and Palette

This is of course up to you to decide, but I always consider it better to keep certain details from the character pre Pokemonification in order to better display they used to be someone else. So things such as hairstyle (Depending on the pokemon of course), eye colour and maybe the overall colour of the pokemon can remain, but as I said before, that'd be up to you to decide.

Optional

-I guess they're less abundant nowadays than what I recall like 10 years ago, but if you wanted to get a Gijinka, AKA humanization of a pokemon, that'd be cool too.

-As trainer is an option, if you want to use the [AGW 1.2](#) instead and turn into [Hex Maniac](#), you can totally go for it.

—
The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-49-AGW-2-4-Pokemonification-885327848>

ARTIST GIRL WATER 2.5 'PONYFICATION' EFFECTS

My Little Pony, Friendship is Magic event. The item in itself is called Poison Joke, a type of flower that tends to cause funny side effects, in this case ponyfication.

Normal or Anthro

Either the four legged look like in the show, or furry/anthropomorphic. You can see examples of ponies that I've drawn before [here](#).

Earthern, Pegasus, Unicorn or Alicorn

No need to explain for most, but just in case:

- Earth Ponies have no wings nor horn
- Pegasi have wings
- Unicorns have a horn
- Alicorns have both wings and horn

Cutie Mark

If visible, AKA not covered by clothes, though if you wanna commission a foal it'd be fine not to have a mark. The Cutie Mark is a symbol on both flanks of a pony character, representing something about their personality, taste, something they specialize in or something they like.

Palette Advice

The characters on the show tend to have a single flat colour for their main body, something I've often seen happens when people draw their Pony OCs is that they just their skin tone, it's fine if you wanna go with that, but keep in mind you can go with a more varied colour.

Extra Details

- If you're ponyfying a character, things like clothes and accessories can be either adjust or removed, footwear will have to be removed though, and in case non anthro ponies pants will have to be removed as well.
- You can go with either soft looking or harder, more realistic looking hooves.
- Like with the previous AGW, if you wanted to get a Gijinka, AKA humanization of a pony, that'd be cool too. Better to stick to canon characters should go with that option though. You can see a few examples [here](#).
- If you want to make a centaur pony that's fine too, though it kinda deviates from the theme unless you went with canon characters.

--

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-51-AGW-2-5-Ponyfication-887972491>

ARTIST GIRL WATER 2.6 'JINAKOFICATION' EFFECTS

This is kind of an specific event, as it's centered around a single character, The character in this event is [Jinako Carigiri](#), from Fate/Grand Order.

To summarize, she's a NEET, who also happens to be the embodiment of Ganesha in the Fate series. The idea of the event will be to have your character (Which can be yourself, an OC or a character from any established franchise) transformed into a half clone of Jinako. I did draw a pic where [TheUrbanLegend52](#) and I got transformed into her, you can see it [here](#).

Human or Servant Form

Jinako shows up in Fate as both human and Servant, you can see examples of both forms [here](#). Just by googling Jinako you should also come across plenty of good examples.

The Human form is kinda self explanatory, if you wanna go with her clothes or anything that looks like it'd fit such a character is fine.

The Servant form is her wearing indian robes, often depicted with a red elephant hat. The hat can be added if you feel like it tho.

The character is also often depicted with four arms, which I can add on either form.

Palette and Clothes

The idea is to make your character resemble her, but still keep enough features around, this is more easily done by keeping either the palette or the clothes. If you want to keep the colours of your character her clothes design should remain and vice versa. There's also the hairstyle of course, which can be your character's, Jinako's or a mixture.

Personality

As said before, Jinako is a NEET, or Hikikomori as they're known in Japan, and I wouldn't put it past the character to also be considered a Fujoshi. Meaning she's naturally quite lazy, and if I draw her it'd be perfectly fitting to have her eating, playing videogames, reading manga, sleeping and even touching herself.

Extra Details

-Jinako is notoriously chubby, and fanart of her often depicts her quite fat, if you wanna keep her rather skinny or go crazy fat with her it'll be entirely your choice, I think considering how lazy she is the only bodytype that wouldn't suit her would be muscular.

ARTIST GIRL WATER 2.7 'JACK-O-POSEFICATION' EFFECTS

Yeah, I know ""Flask"", I mean, the thing Jack O' Valentine carries looks like a ball chain, a bomb and a Jack O' Lantern, so who knows really? :v

I guess this event is easy enough to explain, it'll simply be centered around the [Jack O Pose](#), (also known as Jack O Challenge) which is Jack O' Valentine from Guilty Gear lifting up her butt with legs spreads and crossed arms resting on the floor, it has become a meme/art challenge recently, I know I'm joining the flavour of the month once it has gotten kind of stale, my apologies :T

As I said, it's easy enough to understand, so there won't be much on the way of instructions, the character can be your self insert, an OC, or any character from an established franchise really, I do encourage some creativity of course if you have some suggestions to spice things up a bit though, like the examples you can see here: [Different POV](#), [TG Themed](#), [Lewd](#).

--

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-55-AGW-2-7-Jack-O-Pose-893335669>

ARTIST GIRL WATER 2.8 'KOBOLDIFICATION' EFFECTS

What is a Kobold?

A Kobold is basically a tiny tricky fantasy creature, almost always depicted as a lizard, they're also depicted as dogs or rats, but lizards tend to be the most common form. They're basically the shortstack version of a draconian/draconid/argonian. Looking either cute or mischievous. Of course they're best suited to fantasy and dungeon scenarios, such as magicians, miners, rogues, druids, etc. [Examples](#).

I picked a candle as the item causing the transformation since the first time I stumbled upon them was actually in Warcraft, where... We'll [they're not exactly cute there](#), are they? But if you feel like getting one that looks like those, go ahead :y

Form

As mentioned above, Kobolds are almost always depicted as lizards, but you can go with variations if you'd rather have them be mammals, such as dogs or rats, the main point though is that they keep their small size and general anatomy.

Features

Another bit of simply information I'll need while drawing your picture, which would be skin (or rather scales) colour, whether your Kobold would have horns and/or spikes, and if so what form, length and colour.

Transformed Into or Just There

As it usually goes with AGW events, the idea is that your character will be transformed into a Kobold because of the candle, so if you wanted to go with that your character could simply go from human to Kobold in oversized human clothes, or have their clothes change with them.

OR, if you just want a drawing or a character or characters who had always been Kobolds, there doesn't have to be transformation.

—

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-59-2-AGW-2-8-Kobolds-899874036>

ARTIST GIRL WATER 1.51 'WINTER GIRLSCOUTIFICATION' EFFECTS

This is a repeat of sorts to the [Girl Scout event I did back in 2020](#), this time adding a couple new options. The idea for this event is to simply add a winter twist to the 1.5 Event. Optionally though, the old rules still apply if you want to go with them, but I'll add everything here anyway.

Summary

The idea of this event will be my evil plan of getting my own army of lil girl scouts, hence the character of your choice will get transformed into one as you see in [these examples](#), so if the character is male then TG is a must for this one :3c

You provide a character, which can be yourself, an OC or any character from an established franchise, male or female won't matter, but they'd be transformed into a little girl scout.

Uniform, Accessories and Cookies:

As you can see in the examples, the uniforms are the same, if your character has a hat they can keep it, if they don't they'll have to wear a beret. What's different this time is that I've also added a winter variant of the uniform, the winter theme is mainly a gimmick to bring back the event though, so if you prefer the usual uniform we can go with that.

The plaid skirt's colours vary depending on your character's clothes, as you can see in the examples the colours readjust depending on the character.

There's also the sash, with medals and pins whose design is entirely up to you, you let me know what you want in it and I'll add it.

Since the character would be regressed I can add in things such as braces or a lisp if they're speaking, entirely up to you, if you have any other idea for a good option there feel free to mention it.

Your character can either have some cookie boxes for sale or not, it's up to you, same with the colour of the boxes and the cookie types, not being picky there. >3o

Den Mothers

Should you rather go with an adult instead of a lil' girl scout, only thing that would need to keep consistency is the purple tones, but aside from that the uniform can be tweaked further if you'd prefer it changed.

—

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-63-2-AGW-1-51-Winter-Scouts-906320462>

ARTIST GIRL WATER 2.9 'FAIRYFICATION' EFFECTS

This event will be pretty straight forward, a character of your choice, which can be yourself, an OC or any character from an established franchise, male or female will be turned into a tiny tiny pocket sized cute lil' fairy. I know all of the examples I posted before had the character's clothes staying large, but if you'd rather have the clothes shrink alongside your character or even have their outfit transform in some manner that'd be fine too.

Variations

As said in the previous paragraph this event is pretty straight forward, but if you'd rather go with a [Great Fairy](#), or a [Fat Great Fairy](#), or [even one of those tiny one with wings on their head](#), that'd work too. Hell something like mushroom hat fairies is fine too, feel free to suggest things if you think of something that'd look cool.

Buggy Fairies

If you want to incorporate certain elements like moth fluff, butterfly wings or [other insect parts](#) it can be done too, but keep in mind depending on what you want it might increase the price.

—

ARTIST GIRL WATER 3.0 'VENUS BODYTYPE' EFFECTS

Venus Day. The day dedicated to celebrate the deity of femininity and fertility. To explain things with this event it'll basically be centered around the classical idea of Venus, or to be more specific, the Venus Bodytype, which in itself is categorized as a fetish, a mature female body with a lot of emphasis on fertility and femininity. Thick, full-figured women ripe with the hallmarks of sexual maturity. The object causing the transformation would be, as seen in this picture, a clay figurine of a woman, which could be reshaped depending on what you want. So, to summarize, thick, mature looking, child bearing age looking, voluptuous women.

The character can be yourself, an OC or a character from an established franchise, but of course, this being such a femininity exclusive batch, it goes without saying that the characters can be female only, but, of course, if you want to turn a male character into a female, that's perfectly fine. You can see several more examples in the following link, mind you, most of them are [NSFW](#).

Variations

Adding to the concept is the fact that there have been different types of ideas for the concept of Venus throughout the history of humanity, one of them **Venus of Willendorf**. A prehistoric female statue with heavy emphasis on a bountiful body, which of course still had it's main focus on fertility. The idea of variations also extends to suggestions, so if you have some make sure to write them down here, but you can get the gist of the idea from the summary.

—

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-67-2-AGW-3-0-Venus-912708628>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-67-3-AGW-3-0-Venus-912708706>

ARTIST GIRL WATER 3.1 'CAT GIRL' EFFECTS

This AGW Event had been a long time coming, mainly focusing on Cat Girls, Nekomimis, Nekomatas, whatever you prefer to call them. Or rather cat people, cute cat fembois and handsome cat guys are allowed too.

But, having not forgotten this is the Year of the Tiger event after all, anthro Tigers, kemonomimi tigers and simply people in tiger outfits will be allowed too, you can see all sorts of examples [here](#).

Variations

As you could see in the examples, the choices you'll be able to pick from are either:

-[Nekomimi](#) (Person with cat ears and tail)

-[Toramimi](#) (Person with tiger ears and tail)

-[Anthro Tigers](#) (Humanoid Tiger)

-[People Wearing Tiger Themed Outfits](#) (Things like paws and tiger ear tiaras, not fursuits) An important point to keep in mind though, one of the reasons why I'm making cat girls in general available in this batch is that tigers themselves take considerably longer to draw than cats, so **Anthro Tigers will cost extra** depending on the character.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-69-1-AGW-3-1-Year-of-the-CatGirl-916195583>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-69-2-AGW-3-1-Year-of-the-CatGirl-916195879>

ARTIST GIRL WATER 3.2 'MAIDS' EFFECTS

This one is actually quite straightforward, the cleaning spray causing characters to transform into maids, either by being sprayed by it or by spraying it on something with the intention of cleaning it.

The pics can of course be a before and after if your character gets transformed, but just the "after" or a pic of a maid character is perfectly fine too.

Femboy maids are also fine if you wanna go with that route.

Variations

I believe [this picture](#) explains it best. You can see more examples [here](#).

You can ask for any type of maid, sexy or not, doing any of the usual types of activities you could expect from one, such as dusting, cooking, serving, washing or... Well.. Kinkier things.

Price

As many of my regular customers know, I tend to charge extra for maid outfits due to their complexity, which is why I hardly ever draw them, as they simply take too long to draw. Unless you want a very complex design, the price per character will be an extra 10 USD over the standard price. That for the maid only of course, if you're commissioning a transformation set if the initial form isn't a maid it'd be the standard price.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-71-1-AGW-3-2-Maids-923048316>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-71-2-AGW-3-2-Maids-923048491>

ARTIST GIRL WATER 3.3 'RANMA 1½' EFFECTS

For those unfamiliar with Ranma, the premise is simple, the Cursed Jusenkyo Springs cause those who fall into them to transform when splashed by cold water, reverting to their normal selves with hot water. With Ranma turning into a Redhead Girl and other characters like Ryoga turning into a little black pig and Genma turning into a Panda.

For many people, myself included, Ranma was our first introduction to TG, so amongst the community is one of those things the vast majority of people have seen, even though the formula was quite repetitive.

Summary

The idea of the batch will be of original characters being transformed with Ranma's of course being the main feature as the water from the spring that cursed him would also turn anyone who fell into it into a redhead girl. Characters from other franchises or even direct fanart of the characters from Ranma ½ if you want. Considering the other topics I draw, such as Weight Gain, Age Regression, Nerdification, Impification, etc. if you simply want a pic of a Ranma character being transformed in that manner it'd also apply.

There's no FtM spring though, so if you want to commission a picture of an OC it'll have to adjust to the forms shown on the manga/anime. Another option would be to transform into one of the other human characters of the story though, like Shampoo, Akane or Ryoga so I guess that'd be a good workaround.

You can see examples of female Ranma [here](#). And of the characters who transform into animals [here](#).

You can also check the wiki entrance on the Jusenkyo Springs [here](#) to learn about all the known variations. There's a spring that turns the character from an old man into a little kid, one that turns a fierce warrior into a frail pacifist monk, one that turns a girl into an evil goddess and so on.

Price

If you decide to go with one of the simpler animal forms, price can vary down to half.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-73-2-AGW-3-3-Ranma-926093105>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-73-1-AGW-3-3-Ranma-926092965>

ARTIST GIRL WATER 3.4 'OFFICE GIRL' EFFECTS

The idea of the batch will simply be office gals, could be attorneys, secretaries, politicians, brokers, receptionists, stewardesses, CEOs, your choice, they simply need to look professional. Characters such as Kim Wexler, Franziska von Karma or Isabelle.

You can see plenty of examples [here](#).

Characters can be OCs, real people or characters from established franchises. I'll also add businessmen as an option, but the main focus will be on businesswomen. So male characters would mainly do better being transformed into women.

Characters can also be furies or kemonomimis, as seen on the examples.

Price

Business suits are generally simple to draw, so it's not likely they'd require extra payment, unless you want extras such as furniture and accessories like laptops, filed paperwork or other fitting accessories that may take some time to draw.

—
The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-75-1-AGW-3-4-Office-Girls-929514979>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-75-2-AGW-3-4-Office-Girls-929515195>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-75-3-AGW-3-4-Office-Girls-929515362>

ARTIST GIRL WATER 3.5 'NOBILI-TEA SHORTSTACKS' EFFECTS

This idea of the batch is based on this specific character by [IrateResearchers](#):

[Marian the Little Noble](#)

I've also drawn her several times, as you can see in the following links: [1](#), [2](#), [3](#), [4](#), [5](#)

As you can see on the examples, the idea is little shortstack noble characters, more specifically normal height transforming into lil' nobles as they drink a cup of Marian's Nobili-Tea. Think like a character turning into a Lalafell or a Lilty.

Characters can be OCs, real people or characters from established franchises.

Price

Should you want to add things such as intricate clothes designs accessories that will likely increase the price a bit.

—

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-77-AGW-3-5-Nobili-Tea-932423023>

ARTIST GIRL WATER 3.6 'BUNNY GIRL' EFFECTS

Summary

Bunny Girls, Usagimimis, Usamimis, whatever you prefer to call them. Or rather bunny people, cute bunny fembois and handsome rabbit guys are allowed too. Hares are fine too, if you want your lepus to be more [wild looking](#).

I've drawn many bunnies in the past, which you can see by [looking up in my gallery](#).

Variations

As you could see in [these examples](#), the choices you'll be able to pick from are either:

-[Usagimimi](#), character with rabbit ears and tail, feet too if you prefer. [Mirko](#) from BNHA is also a great example, the [Viera](#) from FFXIV are also a good example of Usagimimi. More examples: [1](#), [2](#), [3](#), [4](#)

-[Bunny Costume](#), characters wearing the typical Playboy Bunny costume, can be adjusted to your liking.

-[Anthro Bunnies](#), self explanatory, anthro/furry rabbits. Like Judy Hopps or Nanachi. More Examples: [1](#), [2](#), [3](#)

-[Pokemon Rabbits](#), such as Lopunny, Cinderace, Bunnelby, etc. Can be done as normal pokemon, [pokemonified characters](#), anthro or [gijinka](#).

-[Mimiga](#), from Cave Story, anthro rabbits with pointy teeth basically, don't feed them Red Flowers. I did an event dedicated to them before, which you can see [here](#).

-[Straight up feral](#), [100% bunnyfied characters](#), these would cost half the price unless you wanted to add a lot of extra accesories.

—

ARTIST GIRL WATER 3.7 'GOBLINIFICATION' EFFECTS

Summary

As mentioned, this will be the Goblinification Event, tiny, pointy eared green shorstacks, maybe with a libido much higher than themselves, not that that's bad thing I guess :3c

It can be yourself, a character of yours or a character from an established franchise getting Goblinified, it can also be a character that's already a Goblin and simply get a pic of them.

Here you can see an example drawn by [ShinMayJay](#), who drew a couple pictures of my ID as a horny gobo:

[Gobo MentalCrash](#)

[Gobocrash about to get what she deserves](#)

I drew this AGW before in a picture, as you can see, it works like this:

[Gobbo Robbo](#)

The Emerald glows and transforms the characters, then turns into a normal, worthless stone. If you'd rather have it in liquid form, it also works kind of as a bath bomb in case you want the character to drink it or bathe in it.

You can see several more examples here: sta.sh/21omq86r9y38

Variations

Only variations for this will be colour and sizes, while of course all goblins are green, as you can see in the examples there's different shades of green, pale, dark, bright and so on. So you let me know which tone you prefer.

As for sizes, this means height, ear size and body features size

While all goblins are of course super short, there's different levels of short, so I'd need to know what size you wanna go with.

Ears also vary, from elf size pointy to spades as big as their heads.

By body features I mean breasts, belly, hips and butt, you have examples of different shapes and sizes in the examples.

Also it'd be up to you if their clothes stay big and floppy, shrink down with them or even reshape in some manner.

—

The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-85-AGW-3-7-Goblin-Girls-956467674>

ARTIST GIRL WATER 3.8 'BIMBOFICATION' EFFECTS

Summary

Basing the concept mainly off of [this post](#), it had memetic potential, I know normally I'd have gone for something like makeup for a bimbo AGW, but this was too perfect not to use.

This event of course is quite self explanatory, but for those who may be unfamiliar with what a bimbo is, [I've drawn several](#).

Bimbos can be done in their usual style, bubbly blonde with huge boobs and tan lines, who loves pink and is too airheaded for her own good, which is the western stereotype, or their japanese equivalent which are known as Gyarū (ギャル), characters like Galko-Chan or Kitagawa are a perfect example for the look.

The character can be yourself, an OC of yours, a character from an established franchise getting bimbofied or simply a character who was already a bimbo.

You can see several more examples here: sta.sh/2ee62mavpbj

Variations

As mentioned before, you have either Gyarū or Classic Bimbos, but of course you'll have to specify things like jewelry, make up, tattoos, clothes, tan lines and even hair colour, blonde is the most typical bimbo hair colour, but it's by no means mandatory.

—
The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-87-1-AGW-3-8-Bimbofication-961828707>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-87-2-AGW-3-8-Bimbofication-961829057>

ARTIST GIRL WATER 3.9 'ORC GIRL' EFFECTS

Summary

This event mainly focuses on female orcs, tall, muscular, scarred, green skinned, pointy eared and with tusks of varying sizes. Though you can get [male orcs](#) if you want.

The way the event works is, you provide a character, which can be yourself, an OC or a character from a established franchise, and get them orkified. The pics can of course be a before and after if your character gets transformed, but just the "after" is perfectly fine too.

If your character is already an Orc tho, like Thrall or Klawjaw, you can simply get artwork of them.

Orcs are in the range of strong to fat, so the character can have a muscular bodytype, strongfat or fat, no room for skinny orcs.

Variations

As mentioned above, orcs tend to be warrior type characters, but there are examples for variations:

- [Classic Orc](#): Fantasy setting, barbarian type muscular with battle scars and tusks
- [Less Convential](#): Fantasy setting but different archetype, an orc can have a noble look and be a different class.
- [Unconventional](#): Orcs in modern or even sci-fi settings are fine too.
- [Playful](#): As the examples show, Baalbudy type humour is perfectly fine. -Others: Such as [Konosuba type](#) pig like orcs, [Tolkien type](#) orcs or [WH40K type](#) orcs.

Physical Quirks

A few physical details to keep in mind would be tusk length, iris/sclera (can be human like or fantasy colours like red iris and yellow sclera), battle scars if any. As well as skin, which can range from black, to gray, to the most common green, to blueish green as well as red like [Fel Orcs](#) and brown like [Draenor Orcs](#).

Details

A small thing to keep in mind, if you want to add lots of things like weapons and armour the price may increase depending on the detail.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-91-1-AGW-3-9-Orc-Girls-969475087>

ARTIST GIRL WATER 1.75 'SPLATOON+' EFFECTS

Summary

So, like the last time I made a Splatoon event, in this one the characters will be transformed into Inklings or Octolings from the game Splatoon. Basically kemonomimi squids and octopi.

It will work the same as previous ones, as mentioned before [I've already made an Splatoon event, back in 2020](#), you provide a character, which can be yourself, an OC or any character from an established franchise, getting splashed/shot at with the ink and thus transforming into an Inkling/Octoling themselves. Characters can be male or female in Splatoon so gender is your choice. Some de-aging might be applicable depending on the character, since Splatoon characters are supposed to be kids... Or is it squids? You can go for a more mature body type if you prefer tho.

You can also go with some of the characters from the franchise, such as the idol characters, like [Callie and Marie](#), [Marina and Pearl](#), [Shiver, Frye and Big Man](#), as well as [Agent 3](#), [Harmony](#), etc. Whether you have a character transforming into them, or simply artwork of the characters. You can also use my character Ika-Ai, the one you see in the AGW picture.

Features

Splatoon Characters, [Inklings and Octolings](#), have design differences in inklings having two suction cups on the white part of their hair whereas octolings have them on top, inklings have an antifaz type mask on their eyes whereas octolings have marked eye mask with no connection, and lastly inklings have three fangs, two on either side of the mouth top and one on the bottom, in the center, whereas octolings have one fang up and one fang down, you can see a good picture example of all these features [here](#).

Other Things:

-Squid/Octopus Form: For 25 USD I can add a Squid/Octopus Form, for those unfamiliar with the game, you can see the example of said forms [here](#). The players use it to traverse through the ink. It'd of course be customized to look a bit more like your character.

-In-Game weapons (Might increase price) Examples: [Main](#), [Sub](#), [Special](#)

-You can see a bunch more example pics [here](#).

Details

A small thing to keep in mind, if you want to add lots of things like weapons and armour the price may increase depending on the detail.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-93-2-AGW-1-75-Splatoon-975129644>

ARTIST GIRL WATER 4.0 'ADVENTURE TIME' EFFECTS

Summary

Either turn characters of your choice (or even yourself) into Adventure Time characters, or simply get artwork of Adventure Time characters in any context of your choice.

There's plenty of characters to choose from, aside from the standard most famous ones like [Finn](#), [Marceline](#), [Bonnibel](#), [Fionna](#) or [Flame Princess](#). There's many many many many more characters in the show, such as [Betty](#), [Canyon](#), [Jake](#), [Huntress Wizard](#), [BMO](#), [Breakfast Princess](#), [Susan Strong](#) and many more you can choose from. If you haven't watched the show you simply can dive into the wiki for a while and you're bound to come across a character design you're fond of.

I've drawn Adventure Time pictures multiple times, you can see examples here:

[Fat Princess Bubblegum and Flame Princess](#), [Group Pic](#), [Fat Marceline](#), My ID as Betty, [TGWG into Princess Bubblegum](#), [TGWG into Flame Princess](#).

And plenty more examples you can see [here](#)

Variations

As mentioned above, you can go with having a character of yours or maybe from an existing franchise either transforming or [cosplaying as an Adventure Time character](#), or simply get artwork of Adventure Time character, as I've drawn them before, can be a normal version, fat version, age regressed version, nerdified version, impified version, etc. etc. etc. NSFW is fine too.

You can also combine or redesign outfits, have them wear different things, etc.

Difference in Price due to Artstyle

As you can see the show has a distinct artstyle with simple faces, hands and noodly limbs, I can do either that style or my usual one, characters drawn in the simplified style from the show will be priced at half.

—

The resulting canvases of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-95-1-AGW-4-0-Adventure-Time-986174962>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-95-2-AGW-4-0-Adventure-Time-986176086>

ARTIST GIRL WATER 4.1 'DRAGON GIRL' EFFECTS

Summary

Like in previous Chinese Zodiac events, you'll be able to get dragonified characters, fan art of dragon characters, such as Smaug, Seath, Toothless, Malygos, etc., feral dragons, dragon kemonomimi, dragon maid type characters, etc.

Variations

As mentioned above, there are several variants, here are some examples, if you have something else in mind just ask about it to see if it'd fit the event.

-**Classic Dragon**: The standard flame breathing gigantic reptile, or a danger noodle like the **Asian Dragons**. Of course should you want a very intricate design the price would go up. But all examples in those would be priced at 65.

-**Dragoness**: Could be like [in this picture](#), or [upper half human, lower half dragon](#), or a draconid design [like this](#), or a somewhat human looking character with small draconid details such as reptile eyes or slightly scaly skin or maybe they just have a tail and can breath fire.

-**Dragon Maid**: Could be fanart of Dragon Maid characters, or Character TF, it doesn't matter if the character is a dragon or a human.

-**Ryumimi/Dragon Kemonomimi**: Pretty much the same as Dragon Maid, but OCs. Dress up works tho, human characters wearing costumes, like a horned tiara or a dragon onesie.

-**DragonBorn and Dragon Anthros**: Simple, anthropomorphic dragons.

-**Dragon Type Pokemon**: You can also get pokemonification or artwork of dragon pokemon (Charizard counts too).

Design Specifics

Dragons tend to have a lot of variety, aside from the basic things like colour, you can have a dragon with or without horns, wings, spikes, etc. So if you have an specific design in mind remember to be specific.

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-101-1-AGW-4-1-Year-of-the-Dragon-1013798153>

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-101-2-AGW-4-1-Year-of-the-Dragon-1013798470>

ARTIST GIRL WATER 4.2 'KITSUNEMIMI' EFFECTS

It is the Fox Girl AGW, The item are Abura-age, fried tofu cakes, according to japanese folklore kitsunes are quite fond of them.

Summary

Simple enough, this batch is everything Fox related, kitsunemimis, anthros, ferals, it can be a character getting transformed into a fox, or just artwork of a character that was already one. It can also be a human wearing a kitsunemimi costume, or a fox onesie, a sci-fi fox suit, etc.

Characters can be OCs, real people or characters from established franchises.

If your character was already a fox, you can get them in a version of some of the other topics I draw, like Age Regression or Weight Gain.

Variations

As mentioned above, there are variants of what you can get:

-Kitsunemimi: A human character with fox ears and tails, such as Senko-San or Ahri, or a Gijinka Ninetales. Your character can also have paws and fox feet, but at least their face and torso should be human.

-Anthro: AKA Furry, anthropomorphic foxes, such as Renamon, Fox McCloud, The Vulpera, Nick Wilde, are all examples of anthro foxes. An anthro Ninetales can also be used here.

-Feral: Animalistic Foxes, such as characters from The Fox & The Hound, or Pokemon such as Ninetales or Zoroark.

You can see examples I've drawn before:

Kitsunemimi: [The Helpful Fox Morgy-san](#), [Stuck in the Middle with You](#), [Starting Again from Foxy Pampers](#), [The Helpful Fox. Sakura-Chan](#), [Never Tease A Kitsune](#)

Feral: [Feeling Foxy](#), [Maternal Instincts](#), [Pokemon Picnic Party 5 - SomariaMoon](#), [Somrina the Teenage Witch](#)

You can see more examples of the first three categories [here](#).

Design Specifics

A small detail but remember to specify the fur colour you wanna go with, naturally foxes have fur going from gray, to brown, red, orange, yellow and white. You can of course also go with exotic colours such as green or purple, just remember to specify the colour you want.

ARTIST GIRL WATER 4.3 'SHRINKING' EFFECTS

The tiniest I've done :V

Summary

Easy to understand, this is the [Drink Me potion from Alice in Wonderland](#), that makes you tiny, smol, itty bitty, pocket sized, or even smaller.

The character of your choice drinks it, they shrink to the size of your choice, what happens to them afterwards? Who knows! I don't, no idea :V

The character can be yourself, an OC or a character from an established franchise, anything goes.

The characters can be alone or at the whim of someone who didn't drink the potion.

Variations

A simple but necessary thing, variations in shrinking can be of course the size but also what happens with the character's clothes, do they shrink with the character? Do they end up naked in a pile of clothes that's now the size of a circus tent?

Angles

A big part (haha) of what makes a shrinking scene look good is size comparison as well as perspectives and POVs, some of these details may increase the price so feel free to ask. And if you want something very specific try and get a good reference for it.

Extras

As usual, extras will increase the price, for instance if you want me to add furniture or an object to do size comparisons, certain simple things can go for free but depending on what you want it may cost more.

—

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-105-2-AGW-4-3-Shrinking-1052331775>

ARTIST GIRL WATER 4.4 'GIANTESS' EFFECTS

This was a HUGE event :V

Summary Easy to understand, the previous event was the Drink Me potion from Alice in Wonderland, so this time it is the [Eat Me cake from the same scene](#), that makes you grow big, huge, gigantic, ginormous.

The character of your choice eats it, they grow to the size of your choice, can be just big enough to bump their head on the ceiling, or to use the building as a seat, or to look at clouds up close, or to play with the solar system like marbles, your choice tbh. The character can be yourself, an OC or a character from an established franchise, anything goes. The characters can be alone or messing with someone who didn't eat the cake. Another good tip is [this website](#) I got linked by someone who commissioned a pic in the previous event, is perfect for size comparisons if you'll be getting a sequence or more than one character.

Note though, I don't do vore nor gore, I know both things are commonly paired with giantesses.

Variations

A simple but necessary thing, variations can of course be the size but also what happens with the character's clothes, do they shrink with the character? Do they end up naked with shredded clothes at their ankles that would now not be big enough to even serve as a napkin?

Angles

A big part (haha) of what makes a growth scene look good is size comparison as well as perspectives and POVs, you have a good example in [this picture](#) from the previous event.

Some of these details may increase the price so feel free to ask. And if you want something very specific try and get a good reference for it.

Extras

As usual, extras will increase the price, for instance if you want me to add buildings or an object to do size comparisons, certain simple things can go for free but depending on what you want it may cost more.

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-107-2-AGW-4-4-Giants-1063175476>

ARTIST GIRL WATER 4.5 'PLUSHIFICATION' EFFECTS

Plush, plushie plushie plush plush, soft plush can't harm, can only hug :v

The sentient variety that is, I gotta make that clear right off the bat, **no inanimate** >.>

Summary

The idea of this event is plushification, turn a character of your choice into a living plushie, can be a character from an established franchise, an OC of yours, or even yourself :v

Examples

There isn't much in the way of variants, I guess just keep in mind the plushies can be animal or human, or pokemon, other species, yaddah yaddah, I've added some examples in [this folder](#).

Details not in that folder such as button eyes are fine too, just keep in mind these plushies aren't inanimate, inanimate transformation is a category I don't draw since I consider it a horror scenario, but you can commission it on Halloween, or maybe commission a pic now and have the sequel drawn in Halloween if you really want the inanimate aspect of it.

As you can also see in [this picture](#) you can also do a plushification swap, as in, in the character is holding a plushie and they basically swap bodies. Whether or not that results in them shrinking is up to you.

NSFW is fine too, human to plushie, plushie to plushie, but it will be to my discretion if I consider some of the ideas good or bad, [this NSFW idea for instance I'd say fine](#).

—
The resulting canvas of this event:

<https://www.deviantart.com/mentalcrash/art/Stream-Batch-109-AGW-4-5-Plushification-1071598531>

ARTIST GIRL WATER 4.6 'MY HERO ACADEMIA' EFFECTS

Summary

For those unfamiliar, My Hero Academia (also known as MHA, Boku No Hero Academia and BNHA) is a superhero story, the characters attend a school to become superheroes. As well as the many fights they have with villain characters.

In the story most people are born with some sort of ability or non-human form, the name of said abilities being known as 'Quirk'.

The idea of this event can be:

- My Hero Academia OCs, can also be done in a character sheet explaining their quirk.
- Character TF, transforming a character or even a real person into a character from MHA.
- Fanart of the franchise's characters, can be normal fanart or any of the TF categories I draw, like Weight Gain, Impification, Goblinification, Age Regression, Gender Change, etc.

[Here's the wiki](#) if you wanna start diving into it, there's tons of characters you can pick.

Clothing Examples

As said above the characters attend an academy, for which they have multiple uniforms:

-[Class Uniform](#)

-[Gym Uniform](#)

-[Cheerleader Uniform](#)

-[Hero Costume](#) <- Note: May increase the base price depending on complexity.

Heteromorphs

Certain characters look less human to different degrees, for instance [Deku](#) looks like a normal human, [Jiro](#) looks mostly human but has audio plugs in her ear lobes, then there's Heteromorphs such as [Tokoyami](#), [Shoji](#) or [Centipeder](#).

Good and Bad Guys

There's alignments of good and bad guys in the story if you want to base your characters off of those.

Good Guys: UA Students, Pro Heroes, International Heroes, Naruhata Vigilantes.

Bad Guys: The League of Villains, Shie Hassaikai, Meta Liberation Army, Nomu, Heteromorphs Enhanced by [Trigger](#).

--

The resulting canvases of this event:

<https://www.pixiv.net/en/artworks/121634912>

ARTIST GIRL WATER 4.7 'HATSUNE MIKU' EFFECTS

Summary

[Hatsune Miku](#) is the face of Vocaloid, a voice synthesizer software, which is why she's widely used for music covers, many of them having become internet classics such as [Vegetable Juice \(Po Pi Po\)](#), [Triple Baka](#), [Levan Polka \(Loituma\)](#), [World is Mine](#) amongst many others.

While there are many Vocaloid characters this event will be centered on her, I'll likely end up making a broader Vocaloid event further down the road.

The character you can commission can be either yourself, an OC or a character from any established franchise as Miku, Miku variants and fanart of hers, as explained below.

Variants

International Miku

Credit where it's due, this trend began with [Brazilian Miku](#), first drawn by [ErinArtista](#), then [Doodly](#) and then it picked up from there. The idea of course was depicting Miku as being Brazilian, adding some local culture to her appearance.

And while of course it started as Brazilian Miku there's [many](#), [many](#), [many](#), [many](#), [many](#) more variants. I'm Chilean, so of course [I had to try this out myself](#) :3c

Meaning if you want to go with this I can design a Miku that culturally fits where you're from, it can be a Miku designed after your state or even county.

And of course this also resulted in other variants you can go with, such as [Chainsaw Miku](#), [Space Marine Miku](#), [Bloodborne Miku](#), etc. etc. etc. So you can go crazy :v

Retired Miku

This one may be a bit more niche. But it's an older Miku variant I'm personally very fond of. Created by [snale](#), it is pretty self explanatory, Miku retired from being an idol, becoming kind of a recluse. I put a bunch of snale's pics in [this folder](#) so you can see several examples.

Others

Which can just apply to any of the many other topics I draw, such as [Weight Gain](#), [Age Regression](#), Impification, Goblinification, Nerdification, etc.

--

The resulting canvases of this event:

<https://www.pixiv.net/en/artworks/122567792>

ARTIST GIRL WATER 4.8 'ME!ME!ME!' EFFECTS

It's the 10 year anniversary of 2014's [Teddyloid song ME!ME!ME!](#) an anime music video first released at the 2014 Japan Animator Expo.

I've drawn the character a couple times in twinning pictures where they're transforming other people into clones: [Example 1](#), [Example 2](#).

So the topic of this event is mainly twinning, but you can get other things with them with all the variety of topics I draw, such as Weight Gain, Age Regression, Impification, Goblinification, Nerdification and the like.

You can see more examples of the titular character [here](#). There are several different clothes she wears so go with whatever you prefer.

If you're getting twinning like in the two pics I drew before, the character transforming into her can be either yourself, an OC or a character from any established franchise.

--

The resulting canvas of this event:

<https://www.pixiv.net/artworks/124853884>

ARTIST GIRL WATER 4.9 'YEAR OF THE SNAKE' EFFECTS

Over the past few years I've done set based around the chinese zodiacs, drawing for instance Cow Girls for the Year of the Ox, or Rabbit Girls for the Year of the Rabbit, this being the year of the snake it'll all about Lamias and other types of snake guys and gals.

The characters can be either an OC of yours, a character from any established franchise, or even yourself.

Variants

I added plenty more examples for the many different variants, you can see all of them in these folders:

-[Lamias](#) are people with the top half of a human and the bottom half of a snake, sometimes they also have pointy ears like elves, sometimes with scales too, and commonly they also have slit pupils and pointy fangs.

-[Naga](#): Snake people who top half are also scaly, but have arms.

-[Snake People](#): Basically humanoid body, but scales covered and with the head of a snake.

-[Snivy](#): As many people know Snivy is my favourite pokemon, if you want to go with it or with any type of snake pokemon that'll also fit the topic.

-[Tsuchinoko](#): real, a ""mythical"" short and round snake from Japan, you can go with a Gijinka, Lamia, or other variant of it if you so wish.

-[Solid Snake](#): It's in his name, it fits, other characters from Metal Gear Solid won't fit the topic though, unless they also happen to have Snake in their name.

-If you have doubts or suggestions just message me.

More Examples, I've drawn a Lamia TF and a couple Nagas, out of a funny coincidence most happened to be fat, but of course that's not a requirement:

[Thneaky Tampering](#), [You're Not Making Any Sssssens](#), [What you get for Sneaking Around](#), [Mad-Viper-Ison](#)

Species Specifics

To keep in mind, let's say you ask for a character that's a lamia, if you want an specific type of snake tail pattern you gotta send me the specifics, there's tons of different types of snakes after all, whether you want a picture based off a real species or not, you gotta tell me the colours.

--

The resulting canvases of this event:

<https://www.pixiv.net/artworks/126905398>

[ARTIST GIRL WATER 5.0](#) 'YINGLET' EFFECTS

Yinglets are tiny furry creatures that kinda look like a cross between a fox and a hen, with the personality of an Animaniac, easily excitable and easy going. With a single big tooth that helps them open up clam shells.

In the story the protagonist Kassen Akoll, a human male, gets turned into a female yinglet after being exposed to a mysterious fluid encased inside a green stone.

Males outnumber females on a ratio of 7 males per each female, but due to males reproductive organs being compatible with other males male on male relationships are quite common, even though they're usually just quick single affairs.

There's many details about their anatomy, sexual dimorphism, eye colour, fur colour, teeth colour and the like you can see in the pages linked below.

What characters can be Commissioned

You can go get a picture of a Yinglet OC, or a character from an established franchise as a Yinglet (Including Out of Placers if you want to get let's say a picture of Kassen or Vizlet), or even yourself or other real people getting the Yinglet treatment.

It can be done in a transformation scene or simply with the character already in Yinglet form, regardless of whether or not they transformed or were born as one.

There are multiple other species in Out of Placers, such as the Baxxid, Indrel and Isher's species, as well as of course many human characters, you can also get a picture starring

those characters, but the main star of this event will of course be the Yinglets themselves.

An assortment of random pages from [ValSalia's official website](#).

You can also support the comic directly via [ValSalia's Patreon](#).

--

The resulting canvases of this event:

<https://subscribestar.adult/posts/1750994>

ARTIST GIRL WATER 5.1 'IMPIFICATION' EFFECTS

Imps, the non-twili variant this time though, my apologies to Midna ;v

The style of imps I'll be drawing you can think of as more like [Huffslove's Tome of Imps](#), but with a tail, can be different colours, and the golden jewelry/accessories are optional. I've drawn these types of imps 3 times before, you can see them here:

[Impmilffication](#)

[Art Trade UDP37](#)

[The Imp Scouts](#)

The characters can be either an OC of yours, a character from any established franchise, or even yourself.

Variants

Anatomy can be quite flexible with these, so there's many variants you can ask to have adjusted:

- Horns: Can be different depending on how you want them, like tiny nub horns, curled horns like a goat, side horns like a buffalo.
- Ears: Length and size, but generally all should be at least somewhat pointy.
- Bodytype: Can go from super skinny to super fat.
- Hands and Feet: Can be human like or claws and hooves instead.
- Colour: Can be any colour you want, except for human skin tone.

-Clothing: Like in the second example, clothes can readjust, fall off or completely vanish, Imps are best nude though, or at least with clothes open enough to show their naughty bits.

--

The resulting canvas of this event:

<https://www.pixiv.net/artworks/129641383>

ARTIST GIRL WATER 5.2 'FOODIFICATION' EFFECTS

Anyone feeling hungry? :T

Summary

This batch is basically all about Food Transformation, which can be either a character (OC, yourself or from any franchise) transforming into living food or just drawings of characters that were already food, such as Princess Bubblegum or Breakfast Princess from Adventure Time, Gummy Goo from The Amazing Digital Circus or Alcremie from Pokemon. The main thing though is that the characters need to have at least some anthropomorphism, you can see more in the examples.

Rules

Basically since it is so often depicted in these types of drawings that the character gets eaten and/or ends up completely reshaped into an immobile piece of food, I gotta add a couple limits:

- No Vore, eating these characters still counts as vore.
- The characters need to at least look kind of human or show that they at least still have some mobility.

Examples

And plenty of them this time, this is a topic that I've only drawn a couple times:

[-Muffin Baked](#)
[-Gourdious Form](#)

But I added several more examples [here](#).

For the design itself you can think it up or I can go a bit crazy with how far transformed you want a character to be, if you want them to just look completely anthropomorphic but having the consistency of a type of food or look almost completely food shaped.

The transformation can happen spontaneously or as a result of the character eating the food they end up transformed into.

--

The resulting canvas of this event:

<https://www.pixiv.net/en/artworks/130073050>

[ARTIST GIRL WATER 5.3](#) 'TANUKIFICATION' EFFECTS

Tanuki time! It's the tanuki, AKA raccoon dog AGW, just this leaf anywhere near you and POOF! You're tanuki!

In japanese folklore, tanukis are yokai (妖怪), magical creatures that can create illusions by transforming themselves into anything.

Variants and Rules

Since this batch is centered around a single species you can go with an anthro, kemonomimi or even feral character. To stretch things a bit more you can also with the rest of the genus, as in, you can go with western raccoons instead of tanukis

Also, if you want to just a picture of a character who's already a tanuki, such as Michiru Kagemori (影森みちる) you can do so too, go to examples to see well... Examples.

The characters can be either an OC of yours, a character from any established franchise, or even yourself.

Examples

First off here's a bunch of examples of Tanuki pictures I've drawn myself:

[Futanuki Sake](#), [Tanuki's Tip](#), [But Does it Leaf an Aftertaste?](#), [New Year. New Tanuki](#), [For the Sake of it](#), [A Prankster's Punishment](#).

[Anthro](#): As in Furry, anthropomorphic animal.

[Tanukimimi](#): As in, human with tanuki ears and tail.

[Feral](#): As in, fully animal-looking tanuki.

Established Tanuki Characters: Such as [Michiru Kagemori](#) from BNA or [Aggretsuko](#).

also

Futanari: Traditional Tanuki statues in Japan are depicted fat and with large testicles, a symbol of luck and success, most of the Tanukis I've drawn are futanaris, as in shemales, women with penises, if you want me to draw one of those ask away.

[Here's an example of a female tanuki into futanari tanuki.](#)

--

The resulting canvas of this event:

<https://www.pixiv.net/en/artworks/131087801>

[ARTIST GIRL WATER 5.4](#) 'LUCKY STAR' EFFECTS

Ohayou Luckies! It's the Lucky Star AGW Event! Lucky Star is basically a classic of Slice of Life anime, the idea of this event will be either Character TF, Fanart or OCs.

Characters

The show stars 4 main characters, [Konata](#) (Careless Otaku), [Kagami](#) (Bossy Tsundere), [Tsukasa](#) (Lazy Airhead) and [Miyuki](#) (Kind & Intelligent). Plus many secondary characters.

[This photo](#) shows the main and secondary student characters from the show. You have a wide range of different personalities, such as [Yutaka](#) being sickly and cutesy, [Minami](#) being withdrawn but kind, [Patricia](#) being a bubbly otaku, etc. ([Hiyori](#) is literally me ngl.)

But there's also [the teacher](#), [Akira the Idol](#) and her assistant [Minoru](#), [Konata's cop cousin](#), and several other relatives such as parents, sisters and the like, I recommend you either watch the series or [go into the wiki](#) if you wanna look for more.

Spin Offs

There's also a recent spinoff I found out about while writing called [Konata's Thirties](#), starring the four main characters now in their 30s. I can go with that variant if you want.

I can also go with speculative scenarios, such as characters now aged up and some even dating each other if it fits in the story, such as Yutaka x Minami, Konata x Kagami, etc.

I'm also allowing fan characters like KuroKona and Spookasa if you want to go that route.

Variants

Character TF: As in, your character turning into one of the girls from Lucky Star, I happened to draw this once so here's an [example](#).

Fanart: Just the characters doing whatever. Can also involve any sort of transformation I draw, for instance any of the characters being Age Regressed, Fattened, Impified, etc.

Star OCs: Your OCs drawn as one of the characters from the series, normal route would be to just draw them wearing the Sailor Fuku, which can be either of their main colours or your OCs clothes reshaped into it, such as in [this drawing of my ID](#).

Character TF and Lucky Star OCs can involve either your own character, a character from an established franchise or even real people.

Clothing Variants

Not much to it, but the characters mainly use two different types of uniforms, [winter Sailor Fuku](#) (Red and White) [summer Sailor Fuku](#) (Blue and White), as well as cheerleader uniform, [swimsuit \(sukumizu\)](#) and just their casual clothes. So you can go with whichever, but the Sailor Fuku is the type of clothes you see on the show.

--

The resulting canvas of this event:

<https://www.pixiv.net/en/artworks/132448639>

[ARTIST GIRL WATER 5.5](#) 'PANTY & STOCKING' EFFECTS

Summary

Here's the Panty & Stocking AGW Event!, Angels and Demons hunting ghosts in order to go back heaven and hell!

As with other franchise themed AGWs the idea of this event will be either Character TF, Panty & Stocking Fanart or Panty & Stocking OCs.

Characters

The show stars four main characters, [Panty](#), [Stocking](#), [Scanty](#) and [Kneesock](#), there's also a big bunch of secondary characters, [Garterbelt](#), [Brief](#), [Chuck](#), [Fastener](#), [Corset](#), and, recently added, [Gunsmith Bitch](#), [Polyester](#) & [Polyurethane](#).

In case you don't know, the series is very raunchy, and utterly unapologetic, the characters turn their underwear into weapons which they use to slay ghosts, Panty, as her name indicates, transforms her panties into a gun, Stocking turns her stockings into swords and so on, [all with a very cool and flashy animation](#).

As an addition to the wiki links, here's a big sta.sh folder with examples of the characters: [Group pictures](#), [Panty & Stocking](#), [Scanty & Kneesock](#), [Brief](#), [Garterbelt](#), [Polyester & Polyurethane](#), [Gunsmith Bitch](#).

Chuck and Fastener, which have very simple designs, would only cost a third the price of a normal character.

Variants

Character TF: As in, your character turning into one of the girls from Panty & Stocking.

Fanart: Just the characters from the series. Can also involve any sort of transformation I usually draw, such as Age Regression, Weight Gain, Goblinification, etc.

OCs: Your OCs drawn as one of the characters from the series.

Character TF and Panty & Stocking OCs can involve either your own character, a character from an established franchise or even real people.

Artstyle

As you can obviously see the show has a very distinct, flash animation-esque looking artstyle, which also shifts for certain scenes like the transformation ones.

I can go with whichever artstyle for your commission, I've never tried drawing characters in [the show's artstyle](#) but I can quickly pick it up :>

--

The resulting canvas of this event:

<https://www.pixiv.net/en/artworks/134591195>

[ARTIST GIRL WATER 5.6](#) 'CHAINSAW MAN' EFFECTS

Summary

The characters in the story fight devils, which are created by human perception of concepts, animals and objects, and differ in strength depending on how much fear the strike on people, for instance the Pen Devil would not cause a lot of fear and would thus be weak, but the Tiger Devil would make lots of people terrified and thus be incredibly strong.

I've listed examples in the variants section.

As far as the event goes, you can get a picture of a Devil, Fiend, Hybrid or Human. It can be yourself, an OC or a character from any existing franchise. Of course as usual since I do so many different topics if you just want a picture of any Chainsaw Man character in any of my usual topics (Gender Bender, Age Regression, Goblinification, etc.) You can get that too.

Variants

Devil

As explained above, would basically just look like a hulking monster or a creepy creature embodying a concept, you can see examples [here](#).

Fiend

Fiends are possessed human beings, they generally look like humans except for their heads, which have weird shapes or protrusions, characters like [Power](#) or [Beam](#).

Hybrid

A few characters are actually fusions of a human with the heart of a Devil, such as [Denji](#), the protagonist, whose heart is the Chainsaw Devil, and can thus transform into a sentient Weapon Devil, other examples of this are the [Katana](#) and [Bomb](#) Devils, amongst [others](#). They essentially grow weapons in their limbs and heads.

An important detail if you intend on commissioning one of these though, characters like Denji with his chainsaws out would have a significative extra charge, since he sprouts three chainsaws out of his body, it takes foreeeever to draw a fully detailed chainsaw, let alone three, and specially if at an angle.

Human

The story has a cast of human and non human characters, you can of course just check the wiki if you wanna see more info, but I also have several example pics of a lot of the cast:

[Denji](#), [Power](#), [Makima](#), [Asa](#), [Aki](#), [Reze](#), [Kobeni](#), [Angel Devil](#), [Nayuta](#), [Himeno](#), [Group Picture](#).

[Pochita](#) is another option, and would go for half the price of a normal character.

--

The resulting canvas of this event:

<https://www.pixiv.net/en/artworks/140937475>

ARTIST GIRL WATER 5.7 'YEAR OF THE HORSE' EFFECTS

The Year of the Horse is nigh :y

Of course as you can guess from the AGW object it'll be mainly Umamusume themed, but if you go to the variants section you can see there'll be more categories.

The transformation trigger object can be the Dream Glimmer from the picture, I initially thought of doing a carrot but I already did that for the Year of the Rabbit. The object can also be a horseshoe, but as usual with these events the transformation trigger is not required to appear in the picture if you don't want it to.

The characters I can draw for this batch can be anything, characters from an established franchise, OCs or even real people.

If you want to get something Uma themed it can also just be those characters being transformed in one of the many ways I usually draw, such as Weight Gain, Nerdification, Age Regression, Pregnancy etc.

Variants

Umamusume, [here's a list of all the characters from the franchise](#) in case you want the picture to star one of them, but of course you can also get an OC or any type of character Umafied.

My Little Pony, the Classic, while I mainly wanna give Umamusume the stage since its ponies I can also do [MLP themed things](#), both in the style of the show as well as [Anthro MLP](#).

Semi Anthro, a bit more rare, Semi anthro are characters who have a bit more animalistic traits than a kemonomimi, such as partial fur on their limbs and/or hooves instead of feet.

Centaur, self explanatory.

Feral, I'm willing to draw actual full on normal horses, or characters turning into them.

Please do keep in mind I won't be drawing Anthro Horses unless they're made in the My Little Pony artstyle.

[ARTIST GIRL WATER 5.8](#) 'THE AMAZING DIGITAL CIRCUS' EFFECTS

It's time for The Amazing Digital Circus event babeeeeeeeeeeeh :v

I was initially planning on making this batch once the series ended, but since I'll be out during March and had to kind of grab out of one of the backlog ideas is the one I decided to go with :>

In case you haven't watched the series, it is available for free on [youtube](#). You can also check [the wiki](#) for references and info.

Of course as you can guess from the AGW object it'll be themed around the show and its characters, go to the variants section so you can see all the categories.

While I did add the VR Headset as the AGW object, it is not required for it to appear in the picture.

Variants

Character TF: Have a character of your choice transformed into one of the characters from the series, as in, said character [Pomnified](#), [Jaxified](#), [Ragathified](#), etc.

The character being transformed can be yourself, an OC of yours, a character of an established franchise or even real people.

Circus Member: You can go with a new design for your character to join the circus, as long as it fits the setting.

Abstracted: The bad ending I suppose, you can get an abstracted version of your character, I don't think it's mandatory every single abstracted character would have the same shape as the one seen in episode 1 but it has to of course fit the glitchy black void and eyes look.

Fan Art: You can of course simply get something TADC themed, either simple Fan Art of any of the series' characters or them being transformed in one of the many ways I usually draw, such as Gender Change, Weight Gain, Nerdification, Age Regression, Goblinification, etc.

ARTIST GIRL WATER 5.9 'NUNIFICATION' EFFECT

He is Rikken lads~!

It's time for uhm... A very Holy AGW, or maybe a very heretical one, I suppose it depends on just how seriously you take Christianity .////.

But, while I didn't grow up a catholic, nun can be done with quite the cute ~~or naughty~~ aesthetic, if you put your mind to it~

I have never drawn them before, but I've always loved [Hyxpk's Little Nuns](#), and [the Sound of Music](#) cartoon was something I grew up with, so the idea for this, you can go what crazy with it.

Buuuuuut, you can also with some of the more unusual, cooler nuns, such as Eda from Black Lagoon or Yumie from Hellsing, as well as horror ones~.

Variants

The Habit does the nun? Have a character of your choice wearing nun robes, the character being transformed can be yourself, an OC of yours or a character of an established franchise.

And you can add extras such as halos or wings, it fits the aesthetic after all.

Oh, and **your character can be male**, boys can be nuns too, I don't discriminate.

Cleric girls such as RPG Healers Just keep in mind if you want me to go crazy with the detail I charge for that >3<

Demoness or even Succubus nuns are good to go too, what's stopping a poor lil' demoness from wanting to wear nun robes?

Sexy nuns, because it happens too, duh. [Go look at the nun tag in Danbooru.](#)

Battle nuns, as said above, like [Eda from Black Lagoon](#) or [Yumie from Hellsing](#).

If you know nuns from other franchises that may fit into any of these categories, just ask away, they'll fit the topic as long as they wear nun robes.

ARTIST GIRL WATER 6.0 'GARDEVOIRIFICATION' EFFECT

Gardevoir~!

Everything in the Gardevoir evolutionary line is allowed for this batch, and that adds up to 7 different characters:

[Ralts](#), [Kirlia](#), [Gardevoir](#), [Gallade](#), [Mega Gardevoir](#), [Mega Gallade](#), [Iron Valiant](#).

So you can commission any of these seven variants. Of course Gardevoir is basically one of the highest ranking pokemon as far as fanart goes, because she has a 'just humanoid enough' design.

Note: Ralts will have a heavy discount, it would cost either 25 USD or 50 USD depending on the amount of detail since they generally have a much simpler design.

Variants

-[Standard Gardevoir Fanart](#): Simply, drawings of a non OC Gardevoir in any context.

-Gardevoir TF: Your character transforming into any of the Gardevoir evolutionary line

-Gardevoir TFing you: Gardevoir transforming you in any way, TG, AR, WG, Pokemonification, etc.

-Gardevoir OCs going through any other example you can think of, such as these examples:

[Feral](#), [Nerdified](#), [Fat](#), [Gigantified](#), [PokeFused](#), [Humanized](#), [More Humanized](#).

[NSFW ones are fairly common too of course.](#)

As you can see the character is very versatile, so if you have any type of crazy idea to design her with, ask away.

Other Characters

If you want to commission any other type of character, other pokemon, trainers or characters from any franchise you can do so, as long as they're accompanying a Gardevoir, for instance if you wanted to get multiple characters from Mystery Dungeon you can get those, but Gardevoir needs to be present.
