

The figure illustrates the integration of multiple data sources into a unified dashboard. It features three main components:

- Istock100 Table:** A table listing top-performing stocks from IStock100. The table includes columns for stock codes (e.g., VNM, FRT), names, prices, volumes, and other financial indicators.
- Navigation Arrow:** A large grey arrow pointing right, labeled "arrow_forward_24px", indicating the flow of information or data transfer between the table and the detailed view.
- NAM GIU Dashboard:** A comprehensive overview of the company NAM GIU. It displays key metrics such as Market Capitalization (M&O CP), Total Company Assets (Tồn công ty), Production Value (Sản GD HOSE), and Stop Loss (STOPLOSS). Below these metrics is a candlestick chart showing the stock's performance over time, along with volume bars.
