

NICOLETTE MIKHAELA PASCUAL

SOFTWARE DEVELOPER

nicolette.pascual@gmail.com | Imus, Cavite, Philippines 4103 | +63 915 001 7898

EXPERIENCE

Streamline Studios

August 2022 – January 2025

Junior Web Application Developer

- Utilized TypeScript for scripting game logic and event handling, demonstrating strong problem-solving and coding skills
- Built web applications using React with Typescript
- Applied general solutions that address issues across various code components, contributing to the overall stability of applications
- Participated in code reviews to maintain code quality and team collaboration
- Determined user needs based on technical requirements and implement practical solutions
- Demonstrated a willingness to learn by actively researching and implementing best practices in game development
- Contributed to the initial development stages of projects, focusing on front-end work and creating cross-project features and components
- Consistently delivered high-quality code on time that exceeds expectations

Dynameyes, Inc.

January 2020 – July 2022

Software Engineer

- Worked on a fintech site project using Vue with TypeScript and integrated API calls using GraphQL
- Contributed to building the foundational logic and front-end components for an e-wallet platform that handled money transfers, KYC, and more
- Managed task delegation and prioritization, and approval of estimates, collaborating with developers, QA, and team leads when necessary
- Set exemplary standards for documentation outlining feature flows and implementation details, ensuring clarity for future developers and teams
- Designed, developed, built, and deployed mobile applications using the Flutter framework, resulting in cross-platform solutions
- Successfully integrated third-party services, including OneSignal push notifications, Google Maps, and Firebase Analytics

Senate of the Philippines

June 2018 – August 2018

Web Application Developer Intern

- Developed service record management web app, streamlining HR processes
- Independently designed and developed a user-friendly service record web application, enabling Senate employees to view, edit, and print employee records.
- Utilized HTML and CSS for interface design; implemented PHP and AJAX for connections to the local server
- Assisted with general clerical and administrative tasks, contributing to the efficient operation of the Human Resources Department

SKILLS

- **Programming Languages:** TypeScript, JavaScript, Dart
- **Web Development:** React JS, Vue.js, HTML, CSS, Sass (Scss), GraphQL
- **Mobile Development:** Flutter, React Native
- **Version Control:** Git, BitBucket, GitHub
- **Cloud Service:** Firebase
- **Integrated Development Environment:** Visual Studio Code, Android Studio
- **Project Management Tools:** Jira, ClickUp
- **Design/Collaboration Tools:** Figma, Zeplin, Slack, Notion, Microsoft Teams, Confluence
- **Content Management Systems:** Payload CMS, WordPress
- **Game Development:** Construct 3, PlayFab

EDUCATION

De La Salle University - Dasmariñas

2015 - 2019

Bachelor of Science in Computer Science

- Dean's Honor Lister for three consecutive years
- Gawad Agham Runner-Up For Best Thesis in App Category
