

Why don't we start by being comfortable?
Find a fully comfortable position
Just settle back.. Being here should mean your responsibilities aren't going to intrude on this session
You've set aside the time and now you can just- relax
Take a moment
Stretch out a little bit, it's good for circulation and even better for helping you relax
And the more relaxed you are the easier it is to fall into trance..
And the more tranced out you become
The more you relax
Becoming a deeper and deeper spiral into a relaxed state of mind
Taking a break from the world, inside your mind, with my voice as your narrator, the conductor of your fantasies..
Just consider me your tour guide, your facilitator...
Just listen very carefully to everything I say..
And find yourself relaxing...
It's easy to do..
So bear with me, ok?
I promise, it'll be fun if you do.
Take your arms- lift them up.. Up up above your head...

I want you to picture something for me...
The most erotic image you can think of...
That one part of a scene, the *snap*best part
The part that makes you *snap*bust *snap* burst *snap* Cum!
Just thinking about it can send you over the edge...
Just so aroused now...
Your mind going deeper into the fantasy, deeper into the trance..
You feel it...
mmm...
