

Hi I'm Subinoy Karmakar and I'm going to talk about the importance of value education.

I'd like to start with a quote by one of the cofounders of the Disney Company, Roy Disney.

When your values are clear to you, making decisions becomes easier.

This quote is as relevant today as when it was made 9 decades ago.

Value education lays emphasis on personality development of the student. The purpose of value education is to mold the student's both physical and emotional aspects so that they can become a good human being.

Uncertainty in covid times. Today's youth is often carried away with the cluttered noise of the society which leads to them feeling lost and finding things meaningless. To tackle this, value education needs to be taught at a young age to promote a democratic way of thinking and living which involves curiosity and good decision making. With over 230 millions youth in India, I'm sure that with value education taught to the youth, our country can soon become vishwaguru.

We are getting empowered as each day passes due to democratization of resources, innovations in technology. For example, 5-6 decades back, only the rich and powerful used to have cars. Now

as technology is getting advanced each day passing, we are getting more and more empowered. With empowerment also comes responsibility and that's where value education comes in.

Hi I'm Subinoy Karmakar and I'm going to talk about the importance of value education.

When your values are clear to you, making decisions becomes easier.

Said Roy Disney, cofounder of the Disney company.

I find this quote as relevant today as when it was made 9 decades ago. I'll tell you why.

I'm sure we have all heard about how due to uncertainty posed especially due to covid, today's youth often gets carried away which makes them feeling lost and finding things meaningless.

And this highlights why value education is the need of the hour

Value education lays emphasis on personality development of the student

It aims to mold the student's both physical and emotional aspects so that they can become a responsible human being

It promotes a democratic way of thinking and living which involves curiosity and good decision making which helps them to make the distinction between the good and bad.

With over 230 millions youth in India, I'm sure that with value education taught to the youth, our country will soon become vishwaguru
